Bowker's Directory of Videocassettes for Children 1999 R R Bowker Publishing, Bowker, 1999-03 P-38 Lightning in Detail & Scale, Part 1 Bert Kinzey, 2024-12-23 The Germans called it Der Gabelschwanz Teufel or The Forked tailed Devil The Japanese referred to it as two planes with one pilot But whatever it was likened to the Lockheed P 38 Lightning represented a giant step forward in combat aircraft design and technology With its twin engine twin boom design and a fuselage pod between the booms the P 38 Lightning was a radically different design from any previous fighter aircraft Its high speed and long range coupled with its firepower being concentrated in the fuselage pod made it one of the most formidable fighters of World War II Ideally suited for operations in the Pacific it scored more aerial victories in that theater than any other USAAF fighter In 1998 Detail Scale published two books on the P 38 Lightning These publications were very popular but have been out of print for quite some time This publication P 38 Lightning in Detail and Scale Part 1 is the first of two newly expanded updated and revised editions of Detail Scale's previous two part coverage of the Lightning A considerable number of color photographs both historical and detail in nature have been added The focus of this volume is on the so called early Lightnings beginning with the first XP 38 prototype and continuing through the P 38H Also included are the related F 4 F 4A and F 5A photographic reconnaissance variants When it first flew in 1939 the Lightning was larger faster and more heavily armed than any fighter aircraft in the world Early variants of the P 38 found themselves thrust into combat as the United States entered World War II In Europe early Lightnings were plagued with problems associated with British fuels interacting with their exhaust driven turbo supercharged engines at high altitudes Elsewhere in northern Africa the Mediterranean the Aleutians and throughout the Pacific the P 38 performed far more effectively and produced outstanding results in combat America's top two aces of World War II Richard Bong and Thomas McGuire scored all of their victories in the large P 38 while flying against smaller more nimble Japanese aircraft known for their maneuverability More than one hundred other aces scored all or most of their victories in the Lightning This publication features expanded and revised historical overviews of the P 38s along with detailed descriptions of each P 38 variant The Early Lightning Details chapter also features new and expanded content compared to the original 1998 book The chapter is illustrated with scores of detailed and meticulously restored photographs accompanied by captions that illustrate both important features and subtle differences between P 38 variants Some of these images are original archival material while others were chosen from hundreds of photos taken specifically for this book by the authors and their contributors Of note the Lightning Details chapter in P 38 Lightning in Detail and Scale Part 1 features photos of the P 38F Glacier Girl to be found nowhere else This P 38 was recovered from under the Greenland ice pack in 1992 Bert Kinzey took these photos during the restoration of Glacier Girl in 1998 and the photographs illustrate the details of the Lightning that would otherwise be difficult or impossible to represent As with all of our publications in the Detail Scale Series the book concludes with a Modelers Section that features

reviews of the plastic model kits of these early P 38 variants Each review impartially and objectively highlights each kit s strengths and weaknesses along with ways that a scale modeler can correct or improve upon accuracy and details P 38 Lightning in Detail Scale Part 1 contains over 200 high resolution photographs along with dozens of detailed line drawings of the P 38 variants covered The Early Lightning Details Chapter alone has 122 photographs
