,1996 *Get the Damn Story* Thomas W. Lippman,2023-04-03 The captivating story of an influential journalist demonstrates the value of a free press to democratic society In the decades between the Great Depression and the advent of cable television when daily newspapers set the conversational agenda in the United States the best reporter in the business was a rumpled hard drinking figure named Homer Bigart Despite two Pulitzers and a host of other prizes he quickly faded from public view after retirement Few today know the extent to which he was esteemed by his peers *Get the Damn Story* is the first comprehensive biography to encompass all of Bigart s journalism including both his war reporting and coverage of domestic events Writing for the New York Herald Tribune and the New York Times Bigart brought to life many events that defined the era the wars in Europe the Pacific Korea and Vietnam the civil rights movement the creation of Israel the end of colonialism in Africa and the Cuban Revolution The news media s collective credibility may have diminished in the age of Twitter but Bigart s career demonstrates the value to a democratic society of a relentless inquiring mind examining its institutions and the people who run them The principle remains the same today the truth matters Historians and journalists alike will find Bigart s story well worth reading **B-29 Superfortress vs Japanese Nightfighter** Mark Lardas,2025-03-13

An illustrated study of the clashes between B 29s conducting night raids on Japan and the Japanese nightfighters protecting the Home Islands from 1944-45. The USAF's B 29-led strategic bombing offensive against Japan succeeded when XX Bomber Command switched from high-level daytime precision bombing to low-level night-time area bombing. The latter tactic required Superfortresses to attack their target individually without a formation or escorting fighters for protection. Despite this, Japanese nightfighters proved unable to stop the B 29s. In this study, Mark Lardas examines the capabilities of the aircraft involved and reveals the conditions under which both sides fought. He evaluates the cutting-edge technology of both sides and how it affected the outcome of the battle. Maps, tactical diagrams, photographs, and specially commissioned artwork bring the action to life as the individual US bombers and Japanese nightfighters fight a classic military duel. **B-29 Superfortress vs Ki-44 "Tojo"** Donald Nijboer, 2017-10-19. By the time the Americans began their aerial bombardment of Japan in 1944, both the JAAF and IJNAF were spent forces. What the Japanese did have though was the Ki 44 Tojo. Armed with two 40 mm cannons, it was the most heavily armed and feared single-seat fighter to see action against the new American bomber, the B 29 Superfortress. For the bomber crews, they had what they believed was their ace in the hole: a fully armed B 29 carried four remotely operated gun turrets and a tail gunner's position, making it the world's most advanced self-defending bomber. In every respect, the Ki 44 pilots were fighting a desperate battle. Many who made their mark did so using suicidal ramming attacks or taiatari. Illustrated with full-colour artwork, this volume examines why the Ki 44 was unable to break up bomber formations conventionally during the Pacific War and how its ramming tactics, while terrifying, graphically revealed Japan's inability to stop the B 29. **Black Snow** James M. Scott, 2022-09-06. Riveting. This book is required reading for anyone with even a passing interest in World War II and the Pacific Theater. Bob Carden, Boston Globe. Seven minutes past midnight on March 10, 1945, nearly 300 American B 29s thundered into the skies over Tokyo. Their payloads of incendiaries ignited a firestorm that reached up to 2,800 degrees, liquefying asphalt and vaporizing thousands. Sixteen square miles of the city were flattened, and more than 100,000 men, women, and children were killed. Black Snow is the story of this devastating operation, orchestrated by Major General Curtis LeMay, who famously remarked, "If we lose the war, we'll be tried as war criminals." James M. Scott reconstructs in granular detail that horrific night and describes the development of the B 29, the capture of the Marianas for use as airfields, and the change in strategy from high-altitude daylight precision bombing to low-altitude nighttime incendiary bombing. Most importantly, the raid represented a significant moral shift for America, marking the first time commanders deliberately targeted civilians, which helped pave the way for the atomic bombing of Hiroshima and Nagasaki five months later. Drawing on first-person interviews with American pilots and bombardiers and Japanese survivors, air force archives, and oral histories never before published in English, Scott delivers a harrowing and gripping account and his most important and compelling work to date. **World War II From Above** Jeremy Harwood, 2014-05-15. This pictorial military history examines the use of spy planes by both sides of WWII as they battled to gain advantage through aerial

intelligence In World War II From Above Jeremy Harwood examines a little known aspect of intelligence gathering operations as they evolved throughout the conflict The volume features dozens of eye catching aerial reconnaissance photographs drawn from the archives compiled by all the major fighting powers His accompanying text profiles the daring pilots who took these photographs and the photographic interpreters who pioneered a new science to reveal the secrets they contained This inspiring and informative history focuses on crucial operations from both the Allied and Axis perspectives from the American Doolittle Raid against Japan to the numerous Allied battles against Germany's cutting edge U boats to the Battle of Monte Cassino and a score of other epic campaigns Told through photographs that have largely never before appeared in print outside of their reconnaissance origins World War II From Above combines history with photography placing the reader in the midst of the action *Flying Magazine* ,1945-05 [Black Tuesday Over Namsi](#) Earl. J. McGill,2012-04-10 A gripping true account of warfare in the skies over Korea when American bombers and North Korean jet fighters would change the course of air combat On October 23 1951 an hour and a half before sunrise nine B 29s of the 307th Bombardment Wing took off from Kadena Air Force Base in Okinawa Japan on a bombing mission against Namsi a North Korean airfield under construction in the heart of the shooting gallery known as MiG Alley In under six hours they would engage in a battle that would forever change the conduct of strategic aerial bombardment Six of the nine aircrafts were shot down the highest percentage of US bombers ever lost on a major mission Unfortunately this event that many experts consider the epic air battle of the Korean War and perhaps the greatest jet engagement in the history of aerial warfare has become another forgotten fight in a forgotten war Here Earl J Hill presents the facts and circumstances of the mission from first briefing to final landing using historical documents firsthand accounts of aircrew members and ground personnel from both sides and photographs of the mission and its aftermath This is the story of those who clashed in the skies above Namsi the events leading up to it and Black Tuesday's historical impact on the aerial warfare tactics **Pamphlets on Petroleum** ,1922
