The Cunning of Freedom Ryszard Legutko, 2021-01-12 This book has two currents The first is an analysis of the three concepts of freedom that are called respectively negative positive and inner Negative freedom is defined as an absence of coercion positive freedom as an ability to rule oneself and others inner freedom as being oneself that is being the author of one's decisions Each concept is analyzed both in terms of its development in the history of ideas and in terms of its internal logic The major problem of negative freedom is to find widely accepted rules according to which this freedom can be distributed Positive freedom's major difficulty is to define what constitutes a free person The greatest dilemma with inner freedom is how to correlate it with the proper interpretation of the human self The book advances the thesis and this constitutes the other current of its narrative that we have been witnessing the advent of a new form of despotism much of it being the effect of liberalism's dominant position Precisely because it took a reductionist position liberalism has impoverished our view of freedom and consequently our notion of human nature with its political moral and metaphysical dimensions
