Supermarkets 50 Years Of Progress:

Supermarkets, 50 Years of Progress Randolph McAusland, 1980 *Shopping at Giant Foods* Alfred Yee, 2012-09-01 From the 1930s through the 1970s Chinese American owned supermarkets located outside of Chinatown catering to a non Chinese clientele and featuring mainstream American foods and other products and services rose to prominence and phenomenal success in Northern California only to decline as union regulations and competition from national chains made their operation unprofitable Alfred Yee's study of this trajectory is an insider's view of a fascinating era in Asian American immigration and entrepreneurship Drawing on oral interviews with individuals who worked in the business during its peak and decline he presents an accessible history that illustrates how this once thriving business fostered the social and economic integration of Chinese Americans into life in the United States Yee demonstrates how Chinese American supermarkets were able to sell American groceries at reduced prices by using the cheap labor of family members and Chinese immigrants whose entry to the United States had been sponsored by their employers This type of symbiotic relationship was eventually undermined by labor unions demands that employees be covered by labor laws and fully compensated for all hours worked Also contributing to the ultimate demise of Chinese American supermarkets were increasing costs of capitalization and operation the dominance of national chain stores and difficulties arising from traditional Chinese methods of business management *The Illustrated History of American Military Commissaries* Peter D. Skirbunt, 2008 Presents a comprehensive history spanning the 233 years of the four major services sales commissaries

Kitchen Literacy Ann Vileisis,2008-02 Ask children where food comes from and they ll probably answer the supermarket Ask most adults and their replies may not be much different Where our foods are raised and what happens to

them between farm and supermarket shelf have become mysteries How did we become so disconnected from the sources of our breads beef cheeses cereal apples and countless other foods that nourish us every day Ann Vileisis's answer is a sensory rich journey through the history of making dinner Kitchen Literacy takes us from an eighteenth century garden to today's sleek supermarket aisles and eventually to farmer's markets that are now enjoying a resurgence Vileisis chronicles profound changes in how American cooks have considered their foods over two centuries and delivers a powerful statement what we don't know could hurt us As the distance between farm and table grew we went from knowing particular places and specific stories behind our foods origins to instead relying on advertisers' claims The woman who raised plucked and cooked her own chicken knew its entire life history while today most of us have no idea whether hormones were fed to our poultry Industrialized eating is undeniably convenient but it has also created health and environmental problems including food borne pathogens toxic pesticides and pollution from factory farms Though the hidden costs of modern meals can be high Vileisis shows that greater understanding can lead consumers to healthier and more sustainable choices Revealing how knowledge of our food has been lost and how it might now be regained Kitchen Literacy promises to make us think differently about what we eat
