

Supplement To The Tuckerman Tables

J Rink

Supplement To The Tuckerman Tables:

A Supplement to the Tuckerman Tables Michael A. Houlden, Francis Richard Stephenson, 1986 This is a supplement to the planetary lunar and solar tables produced by Bryant Tuckerman 1962 1964 These tables have proved an invaluable aid to historians of astronomy An important usage is the dating of ancient and medieval astronomical observations but the tables also have wide application in determining the accuracy of early measurements and calculations This supplementary volume owes its origin to the discovery by the authors of significant errors in Tuckerman s tabular positions of Mars They made a comparison between Tuckerman s positions for the Sun and planets and those computed from an integrated ephemeris Only in the case of the longitude of Mars were errors found to be serious

Exploring Ancient Skies David H. Kelley, Eugene F. Milone, 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

New and Full Moons 1001 B.C. to A.D. 1651 Herman Heine Goldstine, 1973 Originally pub in 1973 reprinted in 1994 Presents tables giving the dates of all new and full moons during an historical era when these data were of considerable interest and importance The longitudes of the moon at each of these times is also given as is a consecutive enumeration of the conjunctions and a similar one of the oppositions All dates are reckoned in the Julian calendar These dates and times are calculated for an observer in Babylon or equivalently Baghdad since this location is fairly centrally located for the historians of the period The time used is civil time and is based on a 24 hour clock with its origin at midnight Since this vol may be considered as a suppl to Tuckerman s tables all fundamental astronomical elements have been taken from them

Egypt and the Limits of Hellenism Ian S. Moyer, 2011-07-07 In a series of studies Ian Moyer explores the ancient history and modern historiography of relations between Egypt and Greece from the fifth century BCE to the early Roman empire Beginning with Herodotus he analyzes key encounters between Greeks and Egyptian priests the bearers of Egypt s ancient traditions Four moments unfold as rich micro histories of cross cultural interaction Herodotus interviews with priests at

Thebes Manetho's composition of an Egyptian history in Greek the struggles of Egyptian priests on Delos and a Greek physician's quest for magic in Egypt In writing these histories the author moves beyond Orientalizing representations of the Other and colonial metanarratives of the civilizing process to reveal interactions between Greeks and Egyptians as transactional processes in which the traditions discourses and pragmatic interests of both sides shaped the outcome The result is a dialogical history of cultural and intellectual exchanges between the great civilizations of Greece and Egypt

Astronomical Papyri from Oxyrhynchus Alexander Jones, 1999 Presents 200 hitherto unpub astronomical texts horoscopes written in Greek on papyrus which were excavated a century ago in the rubbish heaps of Oxyrhynchus a district capital of Roman Egypt Through these documents we obtain the first coherent picture of the range of astronomical activity chiefly in the service of astrology during the Roman Empire The astronomy of this period turns out to have been much more varied than we previously thought with Babylonian arithmetical methods of prediction coexisting with tables based on geometrical models of orbits Editions of the texts are accomp by facing translations explanatory philological commentaries The intro provides the first comprehensive treatment of astronomical papyri explaining their contents purpose the underlying astronomical theories strategies for analyzing dating them Tables graphs **Science in the Archives** Lorraine Daston, 2022-12-22 Archives bring to mind rooms filled with old papers and dusty artifacts But for scientists the detritus of the past can be a treasure trove of material vital to present and future research fossils collected by geologists data banks assembled by geneticists weather diaries trawled by climate scientists libraries visited by historians These are the vital collections assembled and maintained over decades centuries and even millennia which define the sciences of the archives With *Science in the Archives* Lorraine Daston and her co authors offer the first study of the important role that these archives play in the natural and human sciences Reaching across disciplines and centuries contributors cover episodes in the history of astronomy geology genetics philology climatology medicine and more as well as fundamental practices such as collecting retrieval and data mining Chapters cover topics ranging from doxology in Greco Roman Antiquity to NSA surveillance techniques of the twenty first century Thoroughly exploring the practices politics economics and potential of the sciences of the archives this volume reveals the essential historical dimension of the sciences while also adding a much needed long term perspective to contemporary debates over the uses of Big Data in science *Literature 1987, Part 1* S. Böhme, U. Esser, H. Hefele, I. Heinrich, W. Hofmann, D. Krahn, V. R. Matas, L. D. Schmadel, G. Zech, 2013-11-11 *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of the literature concerning all aspects of astronomy astrophysics and their border fields It is devoted to the recording summarizing and indexing of the relevant publications throughout the world *Astronomy and Astrophysics Abstracts* is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union Volume 43 records literature published in 1987 and received before August 15 1987 Some older documents which we received late and which are not surveyed in earlier

volumes are included too We acknowledge with thanks contributions of our colleagues all over the world We also express our gratitude to all organizations observatories and publishers which provide us with complimentary copies of their publications Starting with Volume 33 all the recording correction and data processing work was done by means of computers The recording was done by our technical staff members Ms Helga Ballmann Ms Beate Gobel Ms Monika Kohl Ms Sylvia Matyssek Ms Doris Schmitz Braunstein Ms Utta Barbara Stegemann Mr Jochen Heidt and Mr Kristopher Polzine supported our task by careful proof reading It is a pleasure to thank them all for their encouragement Heidelberg October 1987 The Editors
