Supplement To Criminal Law Theory And Process:

Philosophical Foundations of Criminal Law R. A. Duff, Stuart Green, 2013-01-24 Twenty five leading contemporary theorists of criminal law tackle a range of foundational issues about the proper aims and structure of the criminal law in a liberal democracy The challenges facing criminal law are many There are crises of over criminalization and over imprisonment penal policy has become so politicized that it is difficult to find any clear consensus on what aims the criminal law can properly serve governments seeking to protect their citizens in the face of a range of perceived threats have pushed the outer limits of criminal law and blurred its boundaries To think clearly about the future of criminal law and its role in a liberal society foundational questions about its proper scope structure and operations must be re examined What kinds of conduct should be criminalized What are the principles of criminal responsibility How should offences and defences be defined The criminal process and the criminal trial need to be studied closely and the purposes and modes of punishment should be scrutinized Such a re examination must draw on the resources of various disciplines notably law political and moral philosophy criminology and history it must examine both the inner logic of criminal law and its place in a larger legal and political structure it must attend to the growing field of international criminal law it must consider how the criminal law can respond to the challenges of a changing world Topics covered in this volume include the question of criminalization and the proper scope of the criminal law the grounds of criminal responsibility the ways in which offences and defences should be defined the criminal process and its values criminal punishment the relationship between international criminal law and domestic criminal law Together the essays provide a picture of the exciting state of criminal law theory today and the basis for further research and debate in the coming years *Bowker's Law Books and Serials in Print* ,1993 *Reader's Guide to Periodical Literature Supplement* ,1929 *Dangerous Supplements* Peter Fitzpatrick,1991 In *Dangerous Supplements* expert legal scholars employing a variety of theoretical perspectives feminism poststructuralism semiotics and Marxism challenge predominating views in jurisprudence Prevailing notions of the nature of the law they argue have failed to recognize the law s dependence on social constructs and the indeterminance of language The contributors further claim that proponents of traditional notions have borrowed knowledge from other fields only to reject that knowledge as ultimately subversive and dangerous in its ramifications Taking as a point of departure H L A Hart s *The Concept of the Law* Peter Fitzgerald shows how Hart adopted Wittgenstein s linguistic theory to overthrow J L Austin s simple conception of rules and habits in law only to jettison this theory in order to locate the essence of law in its evolution from a primal scene Other chapters examine the way in which the setting of English law above social relations has masked an imperial mission how the philosophies of Hayek and Marx as well as the discourses of liberalism feminism semiotics and poststructuralism have been assiduously marginalized and rendered inessential to jurisprudence **Document Retrieval Index** ,1973 *University of Michigan Official Publication* University of Michigan,1987 Each number is the catalogue of a specific school or college of the

University **Law and Social Solidarity in Contemporary China** Han Peng, 2020-12-29 This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws thus drawing together western socio legal theory and distinctive Chinese conditions. It draws on Durkheim's theoretical framework and methodology to develop a more comprehensive understanding of the role of law using theories of others such as Habermas and by taking into account the discussion of power and the conflicts of interests in analyzing key social features during transition. The analysis of social anomie in terms of the changes of juridical rules as well as the changes in the nature of social solidarity provides an inspiring perspective to look into contemporary social problems. The book will be essential reading for researchers and academics working in the areas of socio legal studies, legal theory and law and society in China. The New York Supplement, 1909 Cases argued and determined in the Court of Appeals, Supreme and lower courts of record of New York State with key number annotations varies.

Legal Reform in Post-Communist Europe Stanisław Frankowski, Paul B. Stephan III, 1995 This book represents an effort to assess the unprecedented political, economic and social reforms that have swept through Central and Eastern Europe in the five years since the collapse of Communism. The dismantling of the Warsaw Pact, the Council for Mutual Economic Assistance, the Communist Party apparatus and the various manifestations of the nomenklatura political control system have meant different things in different countries but throughout the region we have witnessed a struggle to replace an authoritarian one party political system and a command economy with something resembling Western style constitutional democracy and market economics. Accompanying this struggle have been attempts to transform the legal structure of these countries. It is no exaggeration to claim that lawyers and particularly legal scholars have played a central role in the struggle for reform in post communist Europe. As conceived by its principal organizer and editor Stanisław Frankowski, this study gives these scholars an opportunity to express their perceptions of the success achieved to date and the work still remaining. A secondary goal is to expose a Western audience to the views and insights of legal scholars who have worked within the Central and Eastern European traditions. The four parts of this book reflect the principal areas in which legal reform seemed essential. First comes the reconstitutionalization of the societies in question which means above all else the elimination of single party politics and the notion of unity of powers. Then comes the creation of the legal institutions that would make possible a civil society under law. Then the institutions that moderate and control the uses of state power to discipline and punish persons that have transgressed the society's norms. Finally there is the question of how law reform had dealt with industrial democracy and the anticipated transformation of the workplace.

Chinese Law: Context and Transformation Jianfu Chen, 2015-12-04 China has changed and the continuing changes have not just been about economic development. Among the many transformations there has been another quiet, peaceful and largely successful but far from perfect revolution in the area of law whose deficiencies have been more often mercilessly examined and documented than have its

historical achievements and significance This legal revolution is the subject matter of the present book Like the previous edition in 2008 it examines the historical and politico economic context in which Chinese law has developed and transformed focusing on the underlying factors and justifications for the changes It attempts to sketch the main trends in legal modernisation in China offering an outline of the principal features of contemporary Chinese law and a clearer understanding of its nature from a developmental perspective It provides comprehensive coverage of topics legal culture and modern law reform constitutional law legal institutions law making administrative law criminal law criminal procedure law civil law property family law contracts torts law on business entities securities bankruptcy intellectual property law on foreign investment and trade Chinese investment overseas dispute settlement and implementation of law Fully revised updated and considerably expanded this edition of Chinese Law Context and Transformation is a valuable and important resource for researchers policy makers and teachers alike
