In Search of Business Models in Social Entrepreneurship Samapti Guha, Satyajit Majumdar, 2021-05-28 This book discusses different innovative business models adopted by social enterprises to bring about social change in terms of creating capabilities among the marginalised section of people. These models also bring the sustainability of the enterprises to serve the people continuously. Establishing a theoretical base for further research in the area of business models in social entrepreneurship, the book consists of research work from various disciplines from scholars with experience and insights on social entrepreneurship and who discuss one or more aspects of business model presenting their work with sound research methodologies. The book takes a broader view of the concept: a social entrepreneurs are driven by social value and justice; b social entrepreneur may or may not have a market orientation; c social entrepreneurs solve variety of social problems such as poverty, health, illiteracy, environmental degradation using the principles of business and with the help of social innovation; and d social enterprise focus on bringing social change by creating social impact. Chapters of this book are divided into three core themes. The first one, Concepts, Patterns and Values, includes contributions related to sustainable development, business model and value creation in the context of social entrepreneurship, innovation and cross cultural influence on business models aspects. The chapter of second theme, Enablers and Influencers, discuss role of corporate in promoting social entrepreneurship as a social responsibility, social entrepreneurship and value creation, BoP, market supply chain structural and infrastructural choices, family as a stakeholder of indigenous enterprise and women entrepreneurship. The third and final theme, Innovation, addresses social open innovation and business model innovations, IPR, firm performance, collaboration and alliance, software and biotechnology industries, decision logic behind social enterprise creation and strategy and strategic philanthropy concepts. Containing contributions from academia, industry professionals, investors, policy makers and other professionals all from multiple disciplines, the book would interest the same vast audience.

Comprehensive Logistics Timm Gudehus, Herbert Kotzab, 2012-01-10 This survey of modern logistics updated in a second edition includes proven strategies and tools for solving numerous logistical problems with algorithms and formulae for the computer based planning of logistic systems as well as their dynamic scheduling.

[Proceedings of the 34th International MATADOR Conference](#) Srichand Hinduja, 2004-09-23 Presented here are 73 refereed papers given at the 34th MATADOR Conference held at UMIST in July 2004. The MATADOR series of conferences covers the topics of Manufacturing Automation and Systems Technology Applications, Design Organisation and Management and Research. The 34th proceedings contains original papers contributed by researchers from many countries on different continents. The papers cover both the technological aspect of manufacturing processes and the systems business and management features of manufacturing enterprise. The papers in this volume reflect the importance of manufacturing to international wealth creation, the necessity of responsiveness and agility of

manufacturing companies to meet market led requirements and international change the role of information technology and electronic communications in the growth of global manufacturing enterprises the impact of new technologies new materials and processes on the ability to produce goods of higher quality more quickly to meet markets needs at a lower cost Some of the major generic developments which have taken place in these areas since the 33rd MATADOR conference was held in 2000 are reported in this volume *Ports, Cities, and Global Supply Chains* James Jixian Wang, 2007-01-01 Global trends in policy and technology related fields are rapidly reshaping the port industry worldwide International in scope this volume applies concepts of strategic management supply chain management port and transport economics and economic and t

National Guidelines for Infection Prevention and Control in Healthcare Facilities Mr. Rohit Manglik, 2024-07-30 Provides standardized IPC guidelines for healthcare settings in India focusing on hygiene practices PPE sterilization outbreak containment and surveillance systems *Supply Chain Social Sustainability for Manufacturing* V. Mani, Catarina Delgado, 2018-06-26 This book highlights a number of social sustainability issues at different stages of the supply chain and demonstrates how these issues can be addressed by adopting social sustainability practices in the manufacturing supply chain In the wake of emerging social issues in developing countries research on social sustainability has gained importance for academics and practitioners alike The three distinguishable social sustainability dimensions in manufacturing that emerge as a result of this research provide insights for supply chain managers and practitioners who might otherwise be unaware of what constitutes social sustainability A better understanding allows supply chain managers to address these issues more appropriately to increase their supply chain competitiveness in the market The book presents a social sustainability scale that can be used by practitioners to measure supply chain social sustainability to benchmark their supply chains globally The research also helps academicians to gain an understanding of the social issues related to the manufacturing supply chain while the social measures developed serve as reference material for policy makers and sustainability experts in emerging economies *The Supply Chain Differentiation Guide* Erik Hofmann, Patrick Beck, Erik Fuger, 2012-10-21 The importance of supply chain management has increased over the last few decades Today entire supply chains are competing with each other instead of individual companies As such supply chain management has become a way for companies to set themselves apart from competing companies and their supply chains Interestingly supply chain management mainly focuses on efficiency oriented topics rather than effectiveness driven issues in particular the design of supply chains from manufacturing sites downstream instead of upstream from the customer The Supply Chain Differentiation Guide offers a modern approach to supply chain management While for many years one size fits all approaches to supply chain management were very common the current efforts of managers and academics alike focus on the simultaneous management of multiple supply chains Despite the interest of the business sector in the management of multiple supply chains academia has largely neglected this topic to date The Supply Chain Differentiation Guide addresses this shortcoming

introducing both established and cutting edge management methods to the context of supply chain differentiation and providing inspirations for how to improve corporate operations *The Digital Supply Chain* Bart L. MacCarthy,Dmitry Ivanov,2022-06-09 The Digital Supply Chain is a thorough investigation of the underpinning technologies systems platforms and models that enable the design management and control of digitally connected supply chains The book examines the origin emergence and building blocks of the Digital Supply Chain showing how and where the virtual and physical supply chain worlds interact It reviews the enabling technologies that underpin digitally controlled supply chains and examines how the discipline of supply chain management is affected by enhanced digital connectivity discussing purchasing and procurement supply chain traceability performance management and supply chain cyber security The book provides a rich set of cases on current digital practices and challenges across a range of industrial and business sectors including the retail textiles and clothing the automotive industry food shipping and international logistics and SMEs It concludes with research frontiers discussing network science for supply chain analysis challenges in Blockchain applications and in digital supply chain surveillance as well as the need to re conceptualize supply chain strategies for digitally transformed supply chains
