,1995 Psychiatric and Behavioural Disorders in Developmental Disabilities and Mental Retardation Nick Bouras,1999-06-28 Includes index **Mental Retardation in the Year 2000** Louis Rowitz,2012-12-06 When you look at the advances in the field of mental retardation over the past 30 years it is hard to imagine that more change is inevitable Yet I think back to the time when early in his presidency President Kennedy called together the brightest scientists researchers doctors and educators to develop a comprehensive plan for the nation to effectively care for treat educate and house persons with mental retardation In the early 1960s the call for new research into the causes and the amelioration of mental retardation the development of community based programs and the development of family care for appropriate education vocational training and jobs were seen as revolutionary But in the 30 years since then we have seen time and time again that it is persons with mental retardation themselves who have led the way When the schools were opened to them they learned more than any one ever thought possible when vocational training was provided they learned skills that led to jobs when employment became available they proved to be good steady workers who earned money and paid taxes When the playing fields were made available to them through programs such as Special Olympics they showed the world they could train and compete and WIN in the sports of the Olympics When communities welcomed them they became our neighbors They have earned the right to play on any field to study in any school to hold a paying job and to be anyone s neighbor *American Rehabilitation* ,1994 *Outcome-Based Evaluation* Robert L. Schalock,2013-03-09 This book is the product of 30 years of experience with program evaluation During this time both service recipients and educational and social programs have experienced major cultural and political shifts in service delivery philosophy including a focus on quality mainstreaming deinstitutionalization community inclusion and an emphasis on measurable outcomes Recently stakeholders of these programs have demanded more than just the provision of service forcing program administrators to evaluate their programs effectiveness and efficiency The era of accountability is here and my major goal in writing this book is to help current and future program administrators understand that they need to look beyond simply the provision of service Indeed they need to be competent in outcome based evaluation which I define as a type of program evaluation that uses valued and objective person referenced outcomes to analyze a program s effectiveness impact or benefit cost By design this book can be read from the perspective of a consumer or producer of outcome based evaluation As a consumer the reader will be introduced to the various techniques used in outcome based evaluation and how to interpret data from outcome based evaluation analyses As a producer the reader will be instructed in how to do outcome based evaluation analyses along with how to use and act on their results For both the consumer and producer two questions should guide the use of outcome based evaluation
