well as much more bizarre and lesser known tales too from what day the devil urinates on blackberries to how to stop witches using eggshells as escape boats Hilarious and fascinating A Feast of Folklore will introduce you to the gloriously eccentric folk who aren't often noticed by historians Here lies a smorgasbord of their dark remedies and deadly delicacies waiting to be discovered

Running Silver John Waldman, 2013-10-15 That one could walk drishod on the backs of schools of salmon shad and other fishes moving up Atlantic coast rivers was a not uncommon kind of description of their migratory runs during early Colonial times Accounts tell of awe inspiring numbers of spawners pushing their way upriver the waters running silver to complete life cycles that once replenished critical marine fisheries along the Eastern Seaboard This is a hugely important fascinating and unique look at the fish of North America whose history and life cycles and conservation challenges are poorly understood Despite these primordial abundances over the centuries these stocks were so stressed that virtually all are now severely depressed with many biologically or commercially extinct and some simply forgotten Running Silver will tell the story of the past present and future of these sea river fish This important book will elevate public consciousness of the contrasts between the historical and the present to show the enormous legacy that has already been lost and to help inspire efforts to save what remains Drawing on the author's thirty year career as a scientist and educator with a passion for the native river fish of the North East Running Silver tells the story of these endangered fish with a mix of research historical accounts anecdotes personal experience interviews and images

Wild Waters Richard Nairn, 2023-04-27 I often sit by the bank of the small river that flows through our farm in County Wicklow fascinated by its many moods Getting to know a river is like reading the story of a person's life from its young energetic stages in the hills to the slower moving mature river through to the tranquil water of lakes and finally to its resting place in the sea Richard Nairn is an ecologist who has been visiting waterways around Ireland for over half a century fascinated by how they sustain and enrich our lives Here he sets out on a year long adventure to explore every stretch and tributary of the Avonmore River which runs through Co Wicklow From source to sea he immerses himself in the wildlife archaeology history and people connected to the river Travelling to explore more of Ireland's rivers lakes wet woodlands ponds and canals Richard details encounters with dragonflies crayfish otters and great flocks of migratory waterbirds and

finds himself awestruck by the sense of a lost wilderness they convey With our waterways now under serious threat this is a love letter to Ireland s rivers and lakes and a reminder of what we stand to lose Opens the window into a watery world
