**Trichloroethylene**, 1997 Chemical Exchange Between the Atmosphere and Polar Snow Eric W. Wolff, Roger C.

Bales, 2013-06-29 Polar ice cores have provided tremendous advances in our knowledge of past climate change They also contain an archive of geochemical data which can certainly delineate some of the forcing factors that govern climate change However our ability to interpret these data is severely curtailed by lack of knowledge of the processes governing the transfer of chemical species from the air to the snow This book outlines the potential and problems of ice core chemistry and discusses the processes involved in air snow transfer It gives the state of current knowledge and an agenda for future research **Marine Organic Matter: Biomarkers, Isotopes and DNA** J. Intercontinental Transport of Air Pollution Andreas Stohl, 2004-06-08 Transboundary transport of air pollution has been a topic of scientific research for several decades and has also been addressed already by environmental policies However the importance of air pollution transport on the largest intercontinental scales has been recognized only recently It was soon found that the meteorological and chemical processes involved in intercontinental pollution transport are distinctly different from those occurring during regional scale transport and thus new scientific methodologies are required for their study In this book leading scientists review the current state of knowledge in this emerging field of research providing the reader with a process understanding of global scale transport and its influence on the atmosphere's chemical composition Long range transport of anthropogenic pollution is contrasted with that of pollution produced by natural processes such as dust storms

or forest fires Furthermore the prospects for international management of intercontinental transport of anthropogenic pollution are discussed Waste Gas Treatment for Resource Recovery Piet Lens,C.
