The History Of Air Cargo And Airmail From The 18th Century:

History of Air Cargo and Airmail from the 18th Century Camille Allaz,2005-03 It was first published in French by the Institut du Transport Aerien in 1998 and received very favourable reviews Through the publication of the English language edition this remarkable work is now accessible to many more readers around the world In addition the author has expanded the book with new sections and he has extensively updated it to bring the story of air cargo into the twenty first century concluding with a look into the future The author Camille Allaz served as Senior Vice President Cargo at Air France for 10 years which gave him an insider s close up view of his subject a privilege not enjoyed by many historians There is no aspect of mail or cargo transport by air that has not been thoroughly researched and documented by Allaz from the first brief transport of animals by balloon in France in 1783 to the vast global networks of the integrated express carriers in the 21st century As a true scholar he fits his narrative into the larger framework of political military economic and aviation history This book should stand for years as the definitive work on the history of air cargo and airmail and will be of immense value to the academic community to the air cargo industry the postal services and to the general public **Air Cargo** Joachim G. Schäfer,2023-02-17 This book uses numerous examples to describe the current opportunities and risks of air freight against the backdrop of stagnating transport volumes since the financial crisis in 2008 It shows what impact these developments have had on those involved in particular shippers airlines airports and freight forwarders The application oriented presentation also provides an insight into the design of complex supply chains and the areas of tension in which the players in air freight operate Evolution of International Aviation Dawna L. Rhoades,Jennifer L. Hinebaugh,2025-01-09 The purpose of this book is twofold First it lays out the forces that shaped the international aviation industry and that changed all the rules in the drive for liberalization Second it looks at the many interesting and difficult choices ahead that the airline industry in general and the international aviation industry in particular face These choices include many dichotomies pulling back from the trend toward liberalization or embracing the liberalization trend merging in search of profitability or fragmenting the industry in search of economies These possible futures are explored including the pros and cons of each future from a national consumer employer and employee perspective Evolution of International Aviation has been substantially revised to place the triple crises 9 11 the 2008 Global Financial Crisis and the COVID 19 pandemic into context with the declared new Golden Age of 2018 A4A Brexit renewed government aid around the globe and the Ukraine conflict It includes a new chapter on safety and security that will start with processes and technology introduced after 9 11 such as the 24 hour rule known shippers and Global Entry programs and end with recent biometrics and digital identity As with the previous three editions this fourth edition of Evolution of International Aviation reviews the historical development of the international aviation system From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability consolidation and merger activity The book includes coverage of

the industry segments airlines air cargo and manufacturing to include the emerging commercial space sector It also emphasizes the relationship between aviation and the political process exploring the sustainability of this mode of transportation in a world of climate change high oil prices and political instability Because this book is intended for both the interested amateur and the more serious student references are provided in the text and at the end of each chapter to allow for further in depth study
