Addressing the European study of religion in the interwar period these proceedings tackle one of the most problematic epochs of its history The commonplace that understanding the present requires learning from the past is particularly true as this case well illustrates **A Guide to the Phenomenology of Religion** James L. Cox,2006-06-15 The phenomenological method in the study of religions has provided the linchpin supporting the argument that Religious Studies constitutes an academic discipline in its own right and thus that it is irreducible either to theology or to the social sciences This book examines the figures whom the author regards as having been most influential in creating a phenomenology of religion Background factors drawn from philosophy theology and the social sciences are traced before examining the thinking of scholars within the Dutch British and North American schools of religious phenomenology **Animal Sacrifice and the Origins of Islam** Brannon Wheeler,2022-06-23 Uses textual analysis and various types of material evidence to gain insight into the role of animal sacrifice in Islam Living without a Why Paul O Ingram,2015-04-30 In this book Paul O Ingram adds his voice to a long list of writers seeking to relate Christian tradition to the hard realities of this post Christian age of religious and secular pluralism As a Lutheran Ingram thinks grace flows over this universe like a waterfall So he brings Christian mystical theology into a discussion of the meaning of grace Alfred North Whitehead s philosophical vision provides a language that serves as a hermeneutical bridge by which historians of religions can interpret the teachings and practices of religious Ways other than their own without falsification and by which theologians can appropriate history of religions research as a means of helping Christians advance in their own faith journeys The purpose of the journey of faith is what Whitehead called creative transformation The contemporary theological tradition that has most systematically and coherently followed Whitehead s lead in its reflection on non Christian Ways is process theology which is perhaps the only liberal or progressive theological movement now active in the twenty first century Positioning the Scholar Indrek Peedu,2025-08-13 This book presents a systematic study of the issue of positioning in the scientific study of religion The book discusses the wider context of positioning in the study of religion highlights the epistemological and methodological presumptions as well as the implicit goals in play in the cognitive and evolutionary approaches Particular focus is on the contemporary evolutionary cognitive and behavioral study of religion and the issues of positioning in the context of these research approaches Based on this it presents an in depth analysis of the prevalent conceptualizations of the position of the scholar in the study of religion methodological naturalism methodological agnosticism neutrality and the dialogical position Furthermore for the first time the relevance of both evolutionary epistemology and the underdetermination of scientific research is shown for the purposes of a full evaluation of the justifiability of particular epistemological arguments Finally directions forward in discussing and conceptualizing the position of the scholar in the study of religion are suggested The book is expected to be of relevance and interest for scholars of religion interested in method and theory in the study of religion evolutionary and cognitive study of religion and other related fields **Journeys East** Harry

Oldmeadow,2004-04-28 This is the first book to treat the impact of religious philosophical and psychological traditions of the East on Western intellectuals artists travellers and spiritual seekers in the twentieth century Addressed to both general readers and scholars of religion it is especially valuable for its penetrating and inter religious analysis of two of the most compelling themes now facing the world the emergence of cross cultural religious understanding of the natural order and ecological crisis and the metaphysical basis for both the formal diversity and essential unity of religious traditions of both East and West The West has long romanticized the mysterious East but it has also judged its traditions as uncivilized Our notions about Eastern spirituality have been formed by a succession of travellers scientists artists intellectuals poets philosophers and missionaries as well as by Eastern travellers who have spent time in the West This book helps us to recognize the influence of Eastern ideas upon modern Western thought by tracing the history of engagements between East and West up until the present day It concludes with a section that helps us to perceive the timeless value of the many Eastern contributions to the West s current intellectual and spiritual state

The Twilight of Atheism Alister McGrath,2007-12-18 In this bold and provocative new book the author of In the Beginning and The Reenchantment of Nature challenges the widely held assumption that the world is becoming more secular and demonstrates why atheism cannot provide the moral and intellectual guidance essential for coping with the complexities of modern life Atheism is one of the most important movements in modern Western culture For the last two hundred years it seemed to be on the verge of eliminating religion as an outmoded and dangerous superstition Recent years however have witnessed the decline of disbelief and a rise in religious devotion throughout the world In THE TWILIGHT OF ATHEISM the distinguished historian and theologian Alister McGrath examines what went wrong with the atheist dream and explains why religion and faith are destined to play a central role in the twenty first century A former atheist who is now one of Christianity s foremost scholars McGrath traces the history of atheism from its emergence in eighteenth century Europe as a revolutionary worldview that offered liberation from the rigidity of traditional religion and the oppression of tyrannical monarchs to its golden age in the first half of the twentieth century Blending thoughtful authoritative historical analysis with incisive portraits of such leading and influential atheists as Sigmund Freud and Richard Dawkins McGrath exposes the flaws at the heart of atheism and argues that the renewal of faith is a natural inevitable and necessary response to its failures THE TWILIGHT OF ATHEISM will unsettle believers and nonbelievers alike A powerful rebuttal of the philosophy that for better and for worse has exerted tremendous influence on Western history it carries major implications for the future of both religion and unbelief in our society **Appropriate**

Christianity Charles H. Kraft,2005-06-01 Appropriate Christianity consists of 28 chapters by 18 authors approaching contextualization in three dimensions truth allegiance and spiritual power Over the years there have been quite a number of helpful discussions of the contextualization of theological truth Though we have been helped greatly by them it is high time we began to deal also with allegiance and spiritual power two additional dimensions that Jesus considered of great

importance Any adequate and appropriate treatment of the contextualization of biblical Christianity needs to deal with all three of these crucial dimensions For allegiance to Christ is the basis for all we do that makes us Christian and Jesus was very much into spiritual power If we are to be truly biblical we must deal also with these areas This book is not a festschrift even though it is dedicated to Dr Dean S Gilliland who joined the faculty of Fuller s School of Intercultural Studies in 1977 and has since been developing an emphasis on teaching and research concerning contextualized theology This is a new textbook aimed at expanding our understanding of contextualization and better enabling us to effectively and appropriately communicate biblical Christianity The Living Church ,1967 **The Islamic Secular** Sherman A. Jackson,2024 This book argues that the meaning of secular in the West and in Islam differ fundamentally Though the Islamic secular is a liberation from Islam s sacred law shari ah it is neither outside religion nor a rival to it it seeks neither to discipline nor displace religion nor expand its own jurisdiction at religion s expense The Islamic Secular is in Sherman Jackson s view a complement to religion in effect a religious secular In this book Jackson makes the case for the Islamic Secular on the basis of Islam s own pre modern juristic tradition and shows how the Islamic Secular impacts the relationship between Islam and the modern state including the Islamic State *America's Teilhard* Susan Kassman Sack,2019 America s Teilhard Christ and Hope in the 1960s is a study of the reception of Teilhard in the United States during this period and contributes to an awareness of the thought of this important figure and the impact of his work Additionally it further develops an understanding of U S Catholicism in all its dimensions during these years and provides clues as to how it has unfolded over the past several decades Susan Sack argues that the manner and intensity of the reception of Teilhard s thought happened as it did at this point in history because of the confluence of the then developing social milieu the disintegration of the immigrant Catholic subculture and the opening of the church to the world through Vatican II Additionally as these social and historical events unfolded within U S culture during these years the way Teilhard was read and the contributions which his thought provided changed This book considers his work as a carrier at times for an almost Americanist emphasis upon progress energy and hope in other years his teleological understanding of the value of suffering moves to center Additionally the stories of numerous persons scientists theologians politicians and scholars who became involved in the American Teilhardian effort are detailed Manufacturing Religion Russell T. McCutcheon,1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade s life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute the field s object of study in a form that is ahistoric apolitical fetishized and sacrosanct As such he charges it has helped to create departments jobs and publication outlets for those who are comfortable with such a

suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match Surveying the textbooks available for introductory courses in comparative religion the author finds that they uniformly adopt the sui generis line and all that comes with it As a result he argues they are not just uncritical which helps keep them popular among the audiences for which they are intended but badly disserve but actively inhibit the emergence of critical perspectives and capacities And on the geo political scale he contends the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism

Muslims as Actors

Jacques Waardenburg, 2012-02-13 This book deals with Islamic studies and with the question how the scholarly study of religion can contribute to the study of Islam The author advocates studying Islamic phenomena as signs and symbols interpreted and applied in diverse ways in existing traditions He stresses the role of Muslims as actors in the ongoing debate about the articulation of Islamic ways of life and construction of Islam as a religion A careful study of this debate should steer clear of political religious and ideological interests Research in this area by Muslims and non Muslim scholars alike should address the question of what Muslims have made of their Islam in specific circumstances Current political contexts have created an unhealthy climate for pursuing an open approach to Islam based on reading observing listening and reflecting Yet precisely nowadays we need to look anew at ways of Muslim thinking and acting that refer to Islam and to avoid certain schemes of interpreting Muslim realities that are no longer adequate for present day Muslim life situations Muslim recourse to Islam can be studied as human constructions of value and meaning and relations between Muslims and others can be seen in terms of human interaction without blame always falling on Islam as such
