Self-Observation in the Social Sciences Joshua W. Clegg, 2018-04-17 Notwithstanding the mythical demise of

introspection self observation has always been an integral aspect of the social sciences In the century following the behavioral revolution psychology has seen a reduction not so much in the frequency as in the rigor with which self observation is practiced A great deal of self observation has been renamed or obscured as for example self report but this has served only to defer and impoverish important theoretical and technical work This volume which contributes to the development of a rigorous theory of self observation is organized around three general objectives to re animate a discourse on self observation through a historical analysis of various self observation traditions to outline and begin to address some of the unique theoretical challenges of self observation and to elaborate some of the technical and practical details necessary for realizing a program of research dedicated to self observation In the first section of the book three historians of psychology trace the evolution of self observation In the second three scholars who are currently working in contemporary traditions of self observation discuss the basic theoretical and practical challenges involved in conducting self observation research In the final two sections of the book scholars from the phenomenological and narrative traditions trace the history theory and practice of self observation in their respective traditions Self Observation in the Social Sciences continues the fine tradition set by Transaction s History and Theory of Psychology series edited by Jaan Valsiner It is of interest to psychologists and to those who study methodology within the social sciences Rain Taxi Review of Books ,2000 Voices of the City Rosamond S. Loewen,2021-06-18 Cultural Criticism In the two dozen essays written over a nine month span from 2020 to 2021 G V Loewen attempts to cast the darkest denizens of our own dubious days into the less lurid chiaroscuro of cultural critique The sense throughout that saying is also doing and that words thus carry a greater gravity than is often given them should be kept in mind For us if the word and the deed are to be

brought together at once ethics and aesthetics must again be separated if never to be utterly parted They must travel beside one another in mutual aid but they cannot simply become each other as they did during the period beginning with Goya and ending with Bacon with the 1920s and 1930s reaching the high water mark of this culture critique For us the scandal of art as Paul Ricoeur has aptly put it must indeed balance or at the least balance out the scandal of the false consciousness But the scales upon which this confrontation occurs is held by the hand of ethics alone Adapted from the preface With compassion and criticism both Loewen's second collection of essays on Culture and cultures alike places the reader at the heart of contemporary existence With titles such as *The Depth Psychology of Nervous Wrecks* Who was that Unmasked Man Rendering unto Caesar's Palace Gender the ever bending story and Gandalf Hitler we are immediately aware that this heart is one of contradiction conflict even absurdity In a word it is wholly and irrevocably human and it is to this humanity much more realistic than anything either the PC or Neo Con forces could ever muster that the philosopher directs us And we would be wise to attend
