Home Birth Alice Gilgoff, 2016-02-16 For women who believe that childbirth is a normal event and that hospitals are places to treat illness home birth with a licensed professional midwife is a safe and viable option Unlike the rest of the world where home birth and midwifery are the norm Western society has captured the traditional childbirth model and recreated it as a high tech pathological event fraught with dangerous interventions Yet the United States continues to rank 20th or worse in United Nations statistics of maternal and infant mortality When this book was first published in 1978 the convergence of the back to nature and feminist movements and the rise of consumer advocacy in health care contributed to a growing home birth movement Today a 40% cesarean rate and the universal acceptance of stay in bed electronic fetal monitoring an unproven technology are just two of the common hospital occurrences that keep some women at home for childbirth Midwife comes from the German word that translates as with woman Research has shown that the close observation of an educated and caring woman makes birth complications predictable or preventable Studies published in medical literature have documented that the care of educated professional midwives is equal to or better than that of medical doctors whether the birth takes place in the home or hospital Home Birth reports on this research as well as personal practical stories of real childbearing families The book reviews typical birth practices and gives advice on preparing both the family and the home for the event There is also a chapter on preparing for hospital birth should a transport in labor become necessary

Successful Home Birth and Midwifery Eva Abraham-Van der Mark, 1996 In most of the industrialized Western world the birth process has been almost completely removed from the domain of the woman and the family into the realm of technocratic specialists To imagine that there exists an industrialized country the Netherlands with all the resources of modern medicine of pharmacology and surgery where women and care providers actively espouse a noninterventionist stance in childbirth has always been one of the great puzzles paradoxes and revelations in our field This book traces this most anomalous phenomenon Back cover

seek to birth change The Professional Responsibility Model of Perinatal Ethics Frank A. Chervenak, Laurence B. McCullough, 2014-09-12 This book provides the first clinically comprehensive and practical approach to ethical challenges in perinatal medicine The first chapter introduces and explains the professional responsibility model of perinatal ethics The professional responsibility model is based on the medical ethics of two major physician ethics in the history of Western medical ethics Dr John Gregory 1724 1773 of Scotland and Dr Thomas Percival 1740 1804 of England The professional responsibility model is used to articulate the ethical concept of the fetus as a patient and to operationalize the ethical principles of beneficence and respect for autonomy The book provides practical guidance for clinical judgment and decision making with patients about the responsible clinical management of the wide range of issues encountered by perinatologists in clinical practice and research Topics included periviability feticide intrapartum management maternal fetal conflict innovation for fetal benefit research for fetal benefit non aggressive obstetric management managing the transition from pregnancy to birth destructive procedures such as cephalocentesis critical care for the pregnant patient home birth patient choice cesarean delivery neonatal care as a trial of management and setting limits on neonatal care on the basis of clinical judgments of futility **Beyond NGO-ization** Kerstin Jacobsson, Steven Saxonberg, 2016-04-15 The celebrations marking the 20th anniversary of the fall of the Berlin Wall provoked a debate on the outcomes of the transition process in the post communist countries including a debate on the functioning of civil society This provided a good opportunity for researchers to collect new data and revise the discourse on collective action and the dynamics of civil society in these countries Jacobsson and Saxonberg s collection of essays looks at social movements and their forms of mobilization and organization as well as action repertoires in relation to the social context and their success or failure The book meets an important need in the discourse on post communist social movements by going beyond the usual discourse about the weak and non participatory civil society in the post communist context This book gives a nuanced and updated view of social movements in post communist Europe by looking at the cases of relatively successful mobilization by examining groups that have often been neglected in the discourse on social movements and civil society including animal rights groups racist movements and non feminist family organizations and by giving a deeper analysis of the different strategies that civil society organizations and groups can use Rather than expecting social movements in post communist Europe to follow the same patterns and operate in the same fashion as in Western Europe this volume shows that a wider view of contentious action is needed in order to understand the variety of strategies employed by collective actors operating in this context **Maternities** Robyn Longhurst, 2012-07-26 Over the past decade geographers have shown a growing interest in the body as an important co ordinate of subjectivity and as a way of understanding further relationships between people place and space To date however geographers have published little on what is one of if not the most important of all bodies bodies that conceive give birth and nurture other bodies It is time that feminist social and cultural geographers contributed more to debates about maternal

bodies This book offers a series of windows on the ways in which maternal bodies influence and are influenced by social and spatial processes Topics covered include women coming out as pregnant at work changing fashion for pregnant women being disabled and pregnant the politics of home versus hospital birth breastfeeding practices that sit outside the norm women who are constructed as bad mothers and e mums mothers who go on line **Encyclopedia of Women in Today's World** Mary Zeiss Stange,Carol K. Oyster,Jane E. Sloan,2011-02-23 This work includes 1000 entries covering the spectrum of defining women in the contemporary world *Best Practices in Midwifery* Barbara A. Anderson,Susan Stone,2012-08-24 Print CourseSmart **Varney's Midwifery** Tekoa L. King,Mary C. Brucker,Jan M. Kriebs,Jenifer O.
