**Hope and Uncertainty in Contemporary African Migration** Nauja Kleist, Dorte Thorsen, 2016-11-25 This volume examines the relationship between hope mobility and immobility in African migration Through case studies set within and beyond the continent it demonstrates that hope offers a unique prism for analyzing the social imaginaries and aspirations which underpin migration in situations of uncertainty deepening inequality and delimited access to global circuits of legal mobility The volume takes departure in a mobility paradox that characterizes contemporary migration Whereas people all over the world are exposed to widening sets of meaning of the good life elsewhere an increasing number of people in the Global South have little or no access to authorized modes of international migration This book examines how African migrants respond to this situation Focusing on hope it explores migrants temporal and spatial horizons of expectation and possibility and how these horizons link to mobility practices Such analysis is pertinent as precarious life conditions and increasingly restrictive regimes of mobility characterize the lives of many Africans while migration continues to constitute important livelihood strategies and to be seen as pathways of improvement Whereas involuntary immobility is one consequence another is the emergence and consolidation of new destinations emerging in the Global South The volume examines this development through empirically grounded and theoretically rich case studies in migrants countries of origin zones of transit and in new and established destinations in Europe North America the Middle East Latin America and China It thereby offers an original perspective on linkages between migration hope and immobility ranging from migration aspirations to return

**Anthropology's Philosophy** Nigel Rapport, 2025-07-04. This book focuses on anthropology's ambition for comprehensiveness and its interdisciplinary nature. It consists of concise essays, each around 2,500 words, in which contributors examine how concepts traditionally linked to philosophy or other disciplines are interpreted and applied within anthropology. Each contributor selects a personally inspiring concept and illustrates its relevance to anthropology, showcasing how it takes on new meaning within an anthropological framework. These essays vary in style and content, allowing contributors to discuss the history of the concept, its usage, provide an ethnographic illustration of the concept, or offer an analytical, comparative, or theoretical exposition of the concept as deployed anthropologically. A common theme across all entries is the exploration of anthropological disciplinarity or anti-disciplinarity, highlighting its intellectual flexibility and genre-blurring practices in an effort to approach that expansiveness necessary to do justice to the complexity of human existence.

*Critiquing Social and Emotional Learning* Clio Stearns, 2019-03-08 Social and Emotional Learning SEL has been steadily

gaining traction in education but little attention has been paid to its underlying assumptions In Critiquing Social and Emotional Learning Psychodynamic and Cultural Perspectives Clio Stearns draws on qualitative classroom observations teacher interviews and analysis of prominent SEL program materials to offer a critique of SEL as a codified phenomenon Stearns questions undergirding presumptions about children teachers and SEL s interplay with cultural and educational trends Claiming that SEL participates in cultural demands for hegemonic positivity Stearns illustrates the dangers and undesirable demands of this impossible curricular regime In particular Stearns highlights how closeness and understanding in the classroom are repeatedly circumvented and how normative and necessary parts of life like negative affect and interpersonal conflict are disregarded In Stearns s view the educational community should not consider children s social and emotional worlds as fair domain for mastery or learning Instead we should consider social and emotional education as something without a predetermined endpoint requiring the joint and ongoing participation of teachers and students **The**

anyone with bravery and a strong will can reach for the stars and find out all the secrets of the universe How the story started Once upon a time a young woman named Barbie lived in the lovely town of Glitter Ville Glitter Ville was a beautiful little town in a valley surrounded by hills covered in bright wildflowers The town itself was a sight to see with its cobblestone streets pastel colored houses and streets lined with trees that bloomed in every color of the rainbow It was the kind of place where it felt like time had stopped and every day was a nice warm afternoon Barbie on the other hand was not like the other girls in Glitter Ville She stood out like a sparkling gem among a bunch of different people Barbie was different from her friends because she had a unique sense of fun While the other kids spent their afternoons playing in the town square or exploring the nearby woods Barbie s heart longed for something more She really wanted to see the world outside of her small lovely town The place Barbie lived in was just as appealing as the way she looked Her calm deep blue eyes looked like they held the soul of the evening sky They had a spark of curiosity and wonder that hinted at her unique spirit When Barbie walked her golden hair sparkled and flowed like liquid sunshine It fell in waves down her back catching the light and giving her a warm golden glow wherever she went The people of Glitter Ville were amazed by Barbie s beauty and her special way of making every day look like something special Her laughter sounded like wind chimes in the distance and she could make an easy walk across the town square into a fun adventure Her love of life was inspiring and people were drawn to her like moths to a flame Her friends loved spending time with her But Barbie wasn t just special because she was beautiful or had a charming personality What really set her apart was the fire in her heart which was full of dreams and a strong desire to see the world outside of Glitter Ville Barbie s dreams were as big as the sky and she wanted to go on adventures that would take her to faraway places with amazing things she had never seen before Every night Barbie would sit on her porch and stare at the stars as the sun set and turned the sky pink and orange She would get lost in the sparkling constellations and trace them with her finger as if she could touch them During these times her dreams took off and she imagined herself as a brave explorer who flew through the universe to faraway galaxies and new worlds Barbie s room showed how creative she could be The walls were covered with posters of scientists celestial bodies and spaceships of all shapes and sizes She had a library full of books about astronomy physics and space travel which she read quickly because she was so hungry for knowledge Barbie was determined to find out as much as she could about the universe She knew that knowledge was the key to finding out the secrets of the universe Barbie s sense of adventure however was not just in her head She was a girl who did things and she knew that dreams alone wouldn t get her out of Glitter Ville Barbie wanted to make her dreams come true as much as she wanted to be like the stars she looked up to She knew she couldn t travel by herself so she asked her best friends Skipper Stacie and Chelsea to help her They were a close knit group of friends Each of them had their own skills and quirks but they all loved Barbie and were loyal to her Together they were an unbeatable force that was ready to take on any problem Barbie felt a deep longing in her heart as she lay on her porch and looked up at the stars one beautiful evening The sky was a

medley of colors that made the night in Glitter Ville different from any other. The stars shone with a brightness that seemed to go beyond what was known. Each one looked like a tiny lamp lighting up the dark night and all of them together gave the town a beautiful ethereal glow. Barbie's balcony was her safe place. It was a place where she could get away from the everyday and dive into the mysteries of the world. She would often come back to this place after a long day of learning and getting ready for her next trip. The balcony gave her a first person view of the wonders of the universe that had her mind riveted. Here she found peace, inspiration, and a strong sense of being connected to the world. Barbie leaned back in her balcony chair and ran her fingers along the cool wrought iron fence. A light breeze carried the smell of flowers from nearby fields, and the quiet chirping of crickets was a soothing lullaby. She looked up into the sky and her blue eyes sparkled in the light of the stars. She felt a clear connection to the world. As she looked up at all the stars, she felt a strong sense of desire. It was as if the stars themselves were telling her secrets and pushing her to find out what amazing things were outside of Glitter Ville. It was more than a little girl's usual fantasy; it was a call from the deepest part of her soul. Barbie knew that there was something beyond the twinkling stars that she had to find out about. Since she could remember, she had been getting this feeling. She couldn't stop wanting to go to places no one from Glitter Ville had ever been before. She felt like her future was tied to the stars, and she couldn't fight it any longer. Barbie made a firm choice that changed the course of her life for good. She decided to go on a trip that would take her to meet the stars she looked up to. She didn't make the choice quickly because she knew that such an expedition would be hard and full of unknowns. Barbie, on the other hand, had always been a girl with a strong will. Once she made up her mind about something, she never changed her mind. As Barbie put her plan into action, the next few days were a blur of action. She didn't think she could go on such a crazy trip by herself, so she asked her grandfather, Professor Pops, for help and support. Professor Pops was an old man with a lot of experience. He had once made a rocket that went to the moon. He had always supported Barbie's goals because he saw the same spark of curiosity and excitement in her eyes that had led him to pursue his own. Barbie sat down with her granddad, and they talked late into the night about her goals and dreams. She said she wanted to learn more about the stars, and Professor Pops was happy to help. He knew Barbie could do great things, and he put all of his faith in her. With his help, Barbie started making plans for her trip through space. Barbie's first step was to learn the information and skills she needed to go to space. She worked hard at her studies and read a lot of books about astronomy, physics, and building spaceships. Every day was a chance to learn something new, and she liked the challenge of mastering the hard topics that would prepare her for the unknown. Barbie was very determined, and she put a lot of effort into her schoolwork. She spent a lot of time at the local library, surrounded by stacks of books and notes, learning about how to use the stars to navigate and how rockets work. Her friends, Skipper, Stacie, and Chelsea, joined her in her quest for information. Together, they formed a close and eager study group. Barbie and her friends became a strong team as the days turned into weeks, and the weeks into months. They were all driven by a desire to find out

more about the world They worked on hard math experiments and hands on projects like designing spacecraft parts and making model rockets It was its own journey of discovery as they learned not only about how big the universe is but also about the power of friendship and working together Barbie s room was turned into a makeshift lab with plans charts and mockups of spacecraft parts The walls were covered with posters of astronauts and space adventures which were always a source of inspiration Barbie could feel her excitement growing as they got closer to their goal each day like a rocket getting ready to take off But Barbie s adventures didn t just take place in her studies and in her room She knew that having practical knowledge was just as important as knowing things in theory With the help of her grandfather she and her friends made a life sized copy of their spaceship the Star Dreamer It was a labor of love built with precision and care and it was a physical representation of their hopes and dreams As the Star Dreamer took shape the whole town of Glitter Ville came together to help Barbie and her friends The community came together to help Engineers and craftspeople from the area shared their knowledge and people from the town gave support and supplies The way people worked together in Glitter Ville was a testament to the belief that dreams can come true when a community works together
