The How And Why Of Creation:

Debunking Christian Zionism and Evolutionary Creation Les Nasserden, 2019-03-18 In this modern era many evangelical Christians have adopted two popular beliefs First is Christian Zionism the idea that believers should support modern Israel because it is a fulfillment of biblical prophecy And second is theistic evolution the idea that God used extensive evolution in the creation of the universe and living things While these beliefs are popular unfortunately they are also dangerous to the faith In *Debunking Christian Zionism and Evolutionary Creation* author Les Nasserden presents two separate essays where he rigorously challenges the biblical integrity of those evangelical Christians who believe in these false doctrines In the first essay Les explains why the Christian Zionist project was one of the biggest mistakes evangelical and Pentecostal Christians made in the twentieth century In the second essay he calls theistic evolution a heresy and confronts evangelical Christians with a challenge Are we going to affirm the Word and power of God Or are we going to capitulate to both a lingering modernist rationalism that is wedded to naturalism and a desultory postmodern ethos that denigrates truth the meaning of texts rationality and historical realities Even though many evangelical Christians believe in these doctrines we need to safeguard our minds against false teachings But by turning to the authoritative Word of God and studying the scriptures we can discover the truth and strengthen our integrity

How and Why Michael Trimble, 2000-08-29 What does it take to be considered real A physical presence that can be discerned by touch taste sound sight or smell Are socially important concepts such as justice or morality unreal because they lack the physical traits that would enable us to touch taste hear see or smell them Are the distinctions many of us draw between non fiction and fiction reflective of the manner in which we could confidently sort the real from the unreal Is the apparent capacity of literature philosophy and theology to influence our behavior as human beings a recurring instance of the allegedly unreal guiding the real If I am prepared to acknowledge that ideas possess an apparent capacity to influence my own behavior the viability of separating the real from the unreal based upon physically extended properties is brought into question If I dismiss this traditional method for assaying the presence of reality what am I left with A reality shared by rocks and emotions objects of aesthetic expression that range from Michelangelo's David to Conan Doyle's Sherlock Holmes all of which I knowingly encounter and to each of which I respond in one way or another Does this behavioral acknowledgment on my part play a role in making each of these entities real Does my behavior have a role to play in the creation of reality How and Why a layman's look at causation and reality is a description of how reality is populated and why that population comes about It is based upon a causal foundation that is characterized by uncertainty It offers an explanatory paradigm in which novelty and creativity have indispensable roles to play a paradigm of causal association that can be used to explain but not determine the behavior with which it is affiliated To be considered real one must possess and exercise the capacity to cause which enables one to substantiate both the how and the why of one's existence as an expression of that singular capacity

HOW AND WHY WE CAME FROM PLANET MARS TO PLANET EARTH Philip Omoniyi Adetiloye, PhD,2024-02-27 Science religion and mysticism offer different views on human origin human purpose of existence and the future trajectory of human civilization Science theories regard these quests as products of chance permutations Religion and mysticism claim on the other hand that human origin human purpose of existence and the future trajectory of human civilization had been predetermined by a supreme intelligence that would lead humankind to perfection and the attainment of holiness and heaven Professor Philip Omoniyi Adetiloye s eureka experience and mental illumination during his doctoral research in the late seventies enabled him to discover the links among science religion and mysticism which he has fully exposed in his ingenious books After decades of more advanced research he now offers his insightful revelations and new scientific theories on the origin purpose and possible future trajectory of humankind His findings offer the long sought paradigm shift that revealed the missing link between science and the spiritual His insight has earned him various international recognitions as one of the foremost scientists of the twenty first century and a living legend His new science theories combine the thinking of the best human minds ever in science religion and philosophy This book *How and Why We Came from Planet Mars to Planet Earth* is one of his insightful revelations This is the third of the publication series by the Foundation for Advancement of Culture and Science

A Metaphysics of Creation for the Information Age Liran Shia Gordon,2022-05-23 The metaphysical and theological writings of John Duns Scotus 1265 6 1308 one of the most intriguing albeit if now nigh forgotten philosophers of the late Middle Ages were seminal in the emergence of modernity *A Metaphysics of Creation for the Information Age* A Dialogue with Duns Scotus uses the prism of the concept of Creation as the leitmotif to assemble and interpret Scotus s system of thought in a unified manner In doing so Liran Shia Gordon reframes Scotus s metaphysics such that it confronts the challenges posed by information technology and its impact on our lives thought and actions Surprisingly although there has been great interest in the emergence and dissemination of information technology through the popular media there has not yet been a genuine and vigorous philosophical consideration of the multiple ways information technology alters the basic categories by which we perceive and understand reality Juxtaposing medieval philosophy and information technology offers an unconventional horizon to frame the foundational changes carried by the information revolution and reassess the relevancy of medieval philosophy

The Story of Creation Gibson Callaway Andrews,1900

Cosmology and Controversy Helge Kragh,2021-03-09 For over three millennia most people could understand the universe only in terms of myth religion and philosophy Between 1920 and 1970 cosmology transformed into a branch of physics With this remarkably rapid change came a theory that would finally lend empirical support to many long held beliefs about the origins and development of the entire universe the theory of the big bang In this

book Helge Kragh presents the development of scientific cosmology for the first time as a historical event one that embroiled many famous scientists in a controversy over the very notion of an evolving universe with a beginning in time In rich detail he examines how the big bang theory drew inspiration from and eventually triumphed over rival views mainly the steady state theory and its concept of a stationary universe of infinite age In the 1920s Alexander Friedmann and Georges Lema tre showed that Einstein s general relativity equations possessed solutions for a universe expanding in time Kragh follows the story from here showing how the big bang theory evolved from Edwin Hubble s observation that most galaxies are receding from us to the discovery of the cosmic microwave background radiation Sir Fred Hoyle proposed instead the steady state theory a model of dynamic equilibrium involving the continuous creation of matter throughout the universe Although today it is generally accepted that the universe started some ten billion years ago in a big bang many readers may not fully realize that this standard view owed much of its formation to the steady state theory By exploring the similarities and tensions between the theories Kragh provides the reader with indispensable background for understanding much of today s commentary about our universe

Creation's testimony to its God; or, The accordance of science, philosophy and revelation Thomas RAGG,1863 Perspectives on the Age of the Earth and Why They Matter Francis Ö. Dudás,2020-02-13 Polls show almost half of US adults believe that Earth is only 10 000 years old whereas scientists consider our planet to be 4 56 billion years old Examining these conflicting views illuminates aspects of the perceived conflict between religion and science and helps us understand the battles between evolutionist and creationist advocates This book examines how we approach knowledge and how we look at certainty It disentangles the threads of the traditional knowledge we are taught from the knowledge we gain from our own investigation of truth It argues that nature the basis of science and scripture the basis of religion derive from a single source Because of their shared origins religious and scientific perspectives grounded in verifiable truths must be in harmony The book presents the science behind the reliability of isotopic dates and critiques young earth creationist attacks on isotopic studies Though the nature of time is a philosophical issue its measurement is a scientific venture that has affirmed that Earth is 4 56 billion years old The harmony of science and religion based on recognition of their single source is a prerequisite for the progress of humanity as a whole **Creation's Slavery and Liberation** Presian Renee

Burroughs,2022-11-03 What did the apostle Paul mean when he portrayed the creation as subjected to frustration and enslaved to destruction What forms of frustration and destruction might he have seen throughout the Roman Empire And how would he describe creation s condition today *Creation s Slavery and Liberation* addresses these questions by tracing the story of creation as it appears in Paul s own Scriptures the Tanakh Roman imperial propaganda Paul s letter to Rome and U S industrial agriculture This story reveals God to be the Creator who makes right justifies and makes alive through Jesus Christ and the Spirit Because God liberates justifies and vivifies the entire creation and since according to Paul creation s liberation

is linked to humanity's glorification Paul expects Christians to pursue justice and nourish life Burroughs encapsulates key justice oriented and life supporting practices in seven eco ethical principles To make these principles come alive she describes the ways in which Roman imperial and American industrial regimes have caused injustice and destruction and instead she proposes more regenerative approaches to growing enjoying and sharing our daily bread Proceedings and Reports of the Belfast Natural History and Philosophical Society...
