**Applied Ecological Psychology for Schools Within Communities** Jody L. Swartz, William E. Martin, Jody L. Swartz-Kulstad, 2013-01-11 This volume provides a thorough examination of the interplay between individuals and their environment in the development and maintenance of problem behaviors and delineates procedures for conducting assessment intervention and prevention within the child's ecosystem As individuals structure change and organize their environments their environments work to do the same Environmental or contextual and individual variables act reciprocally to shape an individual's behavior For school aged youth this reality necessitates an ecological approach to assessment intervention and prevention Specifically problem behaviors are partly developed and maintained by a combination of factors present in the child's psychosocial ecosystem home school and community Although there is an abundance of theoretical applications and research supporting this concept the predominant trend has been to emphasize the properties of the person As a result one is left to assume that the genesis of difficulties in adaptation lies in internal or personal states and traits of the individual In contrast to traditional psychology theories which focus primarily on the individual incorporation of ecological psychology concepts allows for a more comprehensive and in depth analysis of sources contributing to the individual's ability to adapt to their psychosocial environment Ecological theories which drive assessment intervention and prevention efforts provide the necessary framework for assisting school aged youth and their associated ecological networks to cope with and overcome the multidetermined multifaceted concerns that arise during the school years However this is an often difficult and cumbersome task for educators parents and school systems to undertake To this end this volume focuses on the functional application of ecological psychology for schools within communities Each of the 10 chapters written by key figures in school family counseling and community psychology explores the use of ecological theory from a different perspective ranging from focus on the child the child within the classroom the classroom teacher and the community to considerations in working with special populations such as juvenile delinquents and in planning for developmental issues such as school to work transition The final chapter summarizes and integrates the previous chapters and provides suggestions for future directions in the field

Wohlwill, 2013-06-29 The present volume in our series follows the format of the immediately in dealing with a topical theme of considerable importance preceding ones in the environment and behavior field In view of current and projected demographic trends it is a certainty that a broad ranging set of issues concerned with the elderly and the physical environment will continue to be of focal pertinence if not of increasing importance in the remaining decades of this century The present volume also follows in the tradition of earlier volumes in the series in being eclectic with respect to content theory and methodology and in including contributions from a variety of disciplines such as anthropology economics psychology geography and urban and regional planning To have encompassed the whole array of disciplines and topics in this emerging field in a single volume would have been impossible We trust that the sample of contributions that we have selected is provocative and that it will illustrate the range of problems and topics and point to promising areas of study and analysis We are pleased to have M Powell Lawton as a guest co editor for this volume His broad ranging expertise perceptive judgment and fine editorial talents have contributed enormously to the volume

*Environmental Practice in the Human Services* Bernard Neugeboren, 1996 *Environmental Practice in the Human Services* points to the need for the human services to return to their historic mission of environmental change It moves beyond the more general conceptual emphasis on person in environment toward the development of an environmental practice technology based on an intervention model which prescribes specific micro and macro roles and functions It may open the way to recapturing the conceptual breadth which characterized the first 40 years of social work as a professional and occupational entity The ecological perspective in social work has fostered an interest in the impact of social environments on service consumers *Environmental Practice in the Human Services* tries to rectify the historical imbalance in the human services that has emphasized people changing methods giving secondary emphasis to environmental change It instructs students preparing for practice in the human services as well as agency practitioners in the knowledge and skills necessary in environmental practice Cases in environmental practice are used to illustrate how these skills are utilized in actual practice situations The book's scope includes practice at the direct service administration planning and social policy levels it integrates micro and macro practice and shows how these two levels of practice are interdependent This enables human

service practitioners to create and or modify social environments to enhance the functioning of clients being served in human service programs Topics covered include important skills in environmental practice including decisionmaking negotiating and leadership community practice and resource coordination social support the impact of organizational environments on practice environmental practice for the chronically disabled Author Neugeboren s approach is unique in its in depth focus on environmental practice applying concepts of social environment to specific practice roles This practice specific content which provides tools needed for environmental practice is in contrast to existing texts on the social environment which are very theoretical and not integrated with practice He includes material from the field of social ecology which has not been included in existing texts It shows how practitioners and administrators planners and policymakers can facilitate and support each other s work Reading Environmental Practice in the Human Services will enlighten students and practitioners with specific skills for impacting on different social environments to enhance client benefit It tells how a direct service practitioner can determine which organizational environments are suitable for particular client needs in making agency referrals It also provides administrators with information about designing planning and managing agencies with functional organizational environments which achieve effective services
