The History Of Art:

Reflections on the History of Art Ernst Hans Gombrich, 1987-01-01 Essays discuss Greek and Chinese art Da Vinci Michelangelo Dutch genre painting Rubens Rembrandt art collecting museums and Freud's aesthetics *A History of Art History* Christopher S. Wood, 2021-03-02 In this authoritative book the first of its kind in English Christopher Wood tracks the evolution of the historical study of art from the late middle ages through the rise of the modern scholarly discipline of art history Synthesizing and assessing a vast array of writings episodes and personalities this original and accessible account of the development of art historical thinking will appeal to readers both inside and outside the discipline The book shows that the pioneering chroniclers of the Italian Renaissance Lorenzo Ghiberti and Giorgio Vasari measured every epoch against fixed standards of quality Only in the Romantic era did art historians discover the virtues of medieval art anticipating the relativism of the later nineteenth century when art history learned to admire the art of all societies and to value every work as an index of its times The major art historians of the modern era however Jacob Burckhardt Aby Warburg Heinrich Wölfflin Erwin Panofsky Meyer Schapiro and Ernst Gombrich struggled to adapt their work to the rupture of artistic modernism leading to the current predicaments of the discipline Combining erudition with clarity this book makes a landmark contribution to the understanding of art history from book jacket **The Story of Art** Ernst Hans Gombrich, 2006-10-07 For use in schools and libraries only A world bestseller for over four decades presents the history of art as a single unfolding narrative a living chain that still links our own time with the Pyramid age **The Invention of Art** Larry Shiner, 2001-09 Larry Shiner challenges our conventional understandings of art and asks us to reconsider its history entirely arguing that the category of fine art is a modern invention and that the lines drawn between art and craft emerged only as the result of key European social transformations during the long eighteenth century Publisher's description **A World History of Art** Hugh Honour, John Fleming, 2009 Spanning continents and millennia ranging from man's earliest cave paintings to the works of Picasso and beyond this is a hugely ambitious book It expands the original coverage by embracing new developments in archaeology and art and historical research and much more *Art History: A Very Short Introduction* Dana Arnold, 2020-01-23 Art history encompasses the study of the history and development of painting sculpture and the other visual arts In this Very Short Introduction Dana Arnold presents an introduction to the issues debates and artefacts that make up art history Beginning with a consideration of what art history is she explains what makes the subject distinctive from other fields of study and also explores the emergence of social histories of art such as Feminist Art History and Queer Art History Using a wide range of images she goes on to explore key aspects of the discipline including how we write present read and look at art and the impact this has on our understanding of art history This second edition includes a new chapter on global art histories considering how the traditional emphasis on periods and styles in art originated in western art and can obscure other critical approaches and artwork from non western cultures Arnold also discusses the relationship between art

and history and the ways in which art can tell a different history from the one narrated by texts ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *The History of Art A.
