*The Origins of the Modern World* Robert Marks,2007 Robert B **Faith and Fortune in the Creation of Our Modern World** Jan Vigg,2024-04-19 This book describes how our modern world came into being as a consequence of a series of accidental events unfolding in Europe from the 5th century onwards The events that led to Europe s success such as a competitive state system the rise of modern science and modern law individualism and the capture of the Americas were coincidental They were unsought unintended and unexpected The book discredits the Eurocentric idea that our advanced civilization is a consequence of cultural values inherent to Europeans such as rational thinking frugality hard work and honesty Modern industrial society which arrived in the span of a century after 50 agricultural centuries is a fluke of history It came as an explosion of technological breakthroughs in the 19th century turning the world European when its technology and economic political and cultural consequences quickly spread all over the planet This book argues that our modern advanced civilization is unique and is unlikely to be found anywhere else in the universe

is so because it is the present that decides how we judge the past The content and the treatment of the book would make it immensely useful in the preparation for the General Studies I Paper II of the Main Examination as well as the Preliminary Examination General Studies Paper I conducted by the UPSC every year Aspirants with History as an optional subject would also benefit from the book as would the UG and PG students of History and the layperson with an interest in History While writing the papers most often UPSC aspirants need to explore and deeply analyse multidimensional aspects of historical events and synthesise simple logical and to the point answers from the complicated layers of historical events This skill would eventually be tested and used in the real life by the budding civil servants who would move later into the higher echelons of the bureaucracy

**The Limits of Empire: European Imperial Formations in Early Modern World History** William Reger, 2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most

important themes of Parker's work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we're proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

**The History of Illiteracy in the Modern World Since 1750** Martyn Lyons, 2022-11-28 This Palgrave Pivot examines the history of literacy with illiterate and semi literate people in mind and questions the clear division between literacy and illiteracy which has often been assumed by social and economic historians Instead it turns the spotlight on all those in between the millions who had some literacy skills but for whom reading and writing posed difficulties Its main focus is on those we have often labelled illiterates rather than those who enjoyed full competence in reading and writing in modern society In offering a historical perspective on the problem of illiteracy in the modern world it also questions some enduring myths surrounding the phenomenon This book therefore has a revisionist objective it intends to challenge conventional wisdom about illiteracy

A Cultural History of Genocide in the Early Modern World Igor Pérez Tostado, 2023-05-04 Historical studies of genocide in the 20th century trace the roots back to the sociopolitical economic and cultural developments of the early modern period From globalization to urbanization to imperialism state formation and homogenization from religious warfare to enlightenment to racism many factors connected with genocide first emerged or vastly developed between the 15th and 18th centuries While the early modern period did not have a crime of genocide it possessed its own legal system which contemplated the rightful destruction of whole peoples and a political culture that sanctioned the use of mass violence As a result early modern genocide has been denied or blurred as a regrettable side effect of the global circulation of ideas goods and peoples and the creation of new societies cultures and languages arising from it This collection looks at the different genocides which unfolded around the globe emphasizing its gendered dimension and its disproportionate and enduring impact on indigenous populations Although European imperialism and homogenization play a central role it aims more widely to cover the principal agents victims and rationale for genocide in the early modern world As a whole this volume aims at fostering the debate on the early modern history of genocide not as an insulated or secondary subject but as a central issue of the era with profound implications for our own
