Hitchhikers Guide to Evangelism , *Health Care in the Information Society* David Ingram,2023-11-17 In this fascinating book David Ingram traces the history of information technology and health informatics from its pioneers in the middle of the twentieth century to its latest developments The book is distinctive in its broad scope and coverage and as the eyewitness account of an author who became the first UK professor appointed with the mission to bridge information technology with everyday medicine health and care In this role he has been a co founder and leader of two rapidly growing initiatives openEHR and OpenEyes which stem from international collaborations of universities health services and industries

These open source and open platform technologies have struck a widely resonant chord worldwide through their focus on community interest endeavours and open access to their methods and outputs. Set against the history of extremely costly burdensome and serially unsuccessful top down attempts of governments to tackle the domain, the book argues for a greater focus on shared endeavours of this kind contributing towards a standardized care information utility that incorporates methods and resources evolved, shared and sustained in the public domain. As information technologies are now at the very core of health care, shaping the relationship between medical services and communities, professions, organisations and industries, this book is important reading for politicians, health care academics, administrators and providers and to anybody interested in the future of health services in the digital age.

Beacon Technologies Stephen Statler, 2016-06-16

Learn the key standards iBeacon, Eddystone, Bluetooth 4.0 and AltBeacon and how they work with other proximity technologies. Then build your understanding of the proximity framework and how to identify and deploy the best solutions for your own business, institutional or consulting needs. Proximity technology, in particular Bluetooth beacons, is a major source of business opportunity and this book provides everything you need to know to architect a solution to capitalize on that opportunity. What You'll Learn: Understand the disruptive implications of digital/physical convergence and the new applications it makes possible. Review the key standards that solutions developers need to understand to capitalize on the business opportunity of proximity technology. Discover the new phenomenon of beacon networks which will be hugely significant in driving strategic decisions and creating wealth. See other technologies in the proximity ecosystem catalyzed by and complementary to Bluetooth beacons including visual light communication, magnetic resonance and RFID. Examine the Beacon System framework for analyzing the proximity ecosystem. Who This Book Is For: Solutions architects of all types, venture capitalists, founders, CEOs, strategists, product managers, CTOs, business developers and programmers. Stephen Statler is a writer, public speaker and consultant working in the beacon ecosystem. He trains and advises retailers, venue owners, VCs as well as makers of beacon software and hardware and is a thought leader in the Beacon System community. Previously he was the Senior Director for Strategy and Solutions Management at Qualcomm's Retail Solutions Division, helping to incubate Gimbal, one of the leading Bluetooth beacons in the market. He is also the CEO of Cause Based Solutions, creators of Give the Change, democratizing philanthropy, enabling non-profit supporters to donate the change from charity-branded debit cards and developer of The Good Traveler program.
