Finding Reliable Information Online Leslie F. Stebbins, 2015-09-16 We live in an information saturated environment and spend far too much time searching surfing skimming contributing and organizing the information in our lives We spend too little time immersing ourselves in reliable high quality information We are often so buried in information and strapped for time that we grab information like it was fast food without bothering to evaluate its quality Finding Reliable Information Online Adventures of an Information Sleuth uses stories or information adventures to illustrate the best approaches to searching for information and to help us develop our aptitude for locating high quality resources in a rapidly changing digital environment that is becoming proficient at monopolizing our attention with useless or unreliable information This book is about taking charge of the search process and not handing over the reins to search engines like Google Bing or Yahoo to dictate what information we consume Each chapter focuses on a quest for different types of information while digging deeper into the complexities of finding credible places to look for information and ways to think about evaluating it As the Internet evolves and becomes more sophisticated our strategies for finding and evaluating information need to evolve as well The stories in this book range from investigating challenging research questions to exploring health issues and everyday life questions like finding a reliable restaurant or product review These chapters go beyond the simple and more mechanical checklist approach to evaluating information though these factors are also discussed

"A Reliable Car and a Woman Who Knows It" Curt McConnell, 2000-09-15 The audacity of driving a horseless carriage from coast to coast in the early years of the 20th century is hard to imagine in an age of superhighways and global positioning systems Roads might be nothing more than muddy ruts made by wagon wheels sources of gasoline or replacement parts were few and agonizingly far between frequent repairs and tire changes were necessary and the traveler was subject to the whole range of nature's perils and discomforts For a woman to attempt the trip was at the time a jaw dropping event Yet in 1909 22 year old Alice Ramsey and three female companions piled into a Maxwell in New York City and 59 days later they triumphantly rolled into San Francisco A few years later silent film star Anita King would become the first woman to make the transcontinental drive solo These and other early coast to coast drives proved women's growing independence as well as the automobile's long distance viability Detailed accounts of five coast to coast drives make up this lively history Drawing from plentiful contemporary newspaper reports and the women's own words author Curt McConnell recounts the bold adventurers' experiences day by day and mile by mile
