## **The Honeycomb:**

**The Book of the Honeycomb's Flow** Isaac Rabinowitz, Judah Messer Leon, 2020-03-15 Judah Messer Leon's *The Book of the Honeycomb's Flow* written in the second half of the fifteenth century is a treatise on the art of rhetoric in which the classical rhetorical doctrine of the Greeks and Romans is applied to the Hebrew Bible. It is the earliest such work by a competent Hebrew scholar. Discussing or alluding to a wide variety of theological, philosophical, political, legal, and psychological subjects, it is one of the most important books of early Renaissance humanism. As the indispensable basis of his annotated English translation, Isaac Rabinowitz has provided the first critical edition of the Hebrew text drawing on an early manuscript, the first print edition of 1475-6, and other pertinent sources. Besides supplying paragraphing and punctuation, his Hebrew text includes references to all passages of Scripture cited for exposition or for illustration of rhetorical doctrine, apparatuses of the variant readings, and of the book's implicit scriptural allusions and reminiscences, and other textual notes. The annotated translation, the first in any modern European language, includes full references to all Messer Leon's classical sources. The introduction to the entire work contains a detailed reconstruction of Messer Leon's life and a full discussion of the nature and intended purposes of *The Book of the Honeycomb's Flow*. The publication of *The Book of the Honeycomb's Flow* will help scholars to appreciate more fully the importance of the vital Italian Jewish culture of the Renaissance.

The model included the finned tube cooler, 45 turning vanes, and the turbulence reduction screens and honeycomb which were the subject of the tests. Hot wire measurements of the turbulence reduction for various combinations of screens and honeycomb were made at various duct speeds. Of the four sizes of honeycomb cells tested, none were found to have a superior performance advantage. The effectiveness of screens and honeycomb in reducing turbulence is greatly affected by relatively minor physical damage; therefore, extreme care must be exercised in installing and maintaining

honeycomb or screens if the turbulence reduction performance is to be maintained      *The Motor World* ,1902
