Wagner, 2008 Urbanization refers to a process in which an increasing proportion of an entire population lives in cities and the suburbs of cities Historically it has been closely connected with industrialization When more and more inanimate sources of energy were used to enhance human productivity industrialization surpluses increased in both agriculture and industry Larger and larger proportions of a population could live

in cities Economic forces were such that cities became the ideal places to locate factories and their workers This new book presents recent and significant research from around the globe

The Earth as Transformed by Human Action B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere

Ranching, Mining, and the Human Impact of Natural Resources Development Raymond L. Gold, This book is intended for people interested in the environment American society rural and urban affairs social impact assessment and urban structures generally It is also aimed at industrial and community planners and natural resource development firms and formulated to implement a social policy concerning resource development and public agencies Ranching Mining and the Human Impact of Natural Resources Development reports and observes people whose lives have been importantly affected by industrialization of rural communities in the American West Such community change research is rarely done but is invaluable for its real world groundings for a variety of social science theories This study evolved out of ethnographic research of Western communities done over a full decade Initially performed to meet requirements for social impact analysis these studies have a much larger concern namely identifying those areas of social change that contribute to the standing of small communities and how they persist in the face of seemingly overwhelming odds of the highly advanced urban complex Professor Gold has written the first work which examines and accounts for the rise of local citizens groups to a sense of being a community Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in Western societies It places the Gemeinschaft in proper perspective as the foundation upon which all other aspects of community social structure are built In this regard it is a contribution to basic social theory showing clearly the interrelation between small community and large society elements of the structure and functioning of community life The work is subtly textured combining structural cultural and symbolic perspectives in its account of the experience of the community of Sagebrush Gold's monograph is one of a kind No other book brings together the story of social effects of natural resource development projects in the American West

Urban Ecology John Marzluff, Eric Shulenberger, Wilfried Endlicher, Marina Alberti, Gordon Bradley, Clare Ryan, Craig ZumBrunnen, Ute Simon, 2008-01-03 Urban Ecology is a rapidly growing field of academic and practical significance Urban ecologists have published several conference proceedings and regularly contribute to the ecological architectural planning and geography literature However important

papers in the field that set the foundation for the discipline and illustrate modern approaches from a variety of perspectives and regions of the world have not been collected in a single accessible book *Foundations of Urban Ecology* does this by reprinting important European and American publications filling gaps in the published literature with a few targeted original works and translating key works originally published in German This edited volume will provide students and professionals with a rich background in all facets of urban ecology The editors emphasize the drivers patterns processes and effects of human settlement The papers they synthesize provide readers with a broad understanding of the local and global aspects of settlement through traditional natural and social science lenses This interdisciplinary vision gives the reader a comprehensive view of the urban ecosystem by introducing drivers patterns processes and effects of human settlements and the relationships between humans and other animals plants ecosystem processes and abiotic conditions The reader learns how human institutions health and preferences influence and are influenced by the others members of their shared urban ecosystem

Ranching, Mining, and the Human Impact of Natural Resource Development Raymond L. Gold, 2017-07-28 In *Ranching Mining and the Human Impact of Natural Resource Development* Raymond L. Gold observes and reports on people whose lives have been significantly affected by the industrialization of rural communities in the American West Such community change research is rarely done so this classic study is invaluable for its real world groundings applicable to a variety of social science theories The study evolved out of ethnographic research on Western communities done over a full decade This was the first work of its kind to examine and account for the rise of local citizens groups on the sense of being a community Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in the American West In this regard it is a contribution to basic social theory showing clearly the interrelation between small community and large society elements of the structure and functioning of community life No other book brings together the story of social effects of natural resource development projects in the American West This book shows how to implement a social policy concerning resource development and public agencies It is intended for people interested in the environment American society rural and urban affairs social impact assessment and urban structures generally It is also aimed at industrial and community planners and natural resource development firms
