The Human Self William Paul Meacham, 1968

Creative Virtualities in Human Self-Interpretation-in-Culture

Anna-Teresa Tymieniecka, 2012-12-06 It would seem that modern humanity has unthroned the human spirit undercutting the very foundation of the validity of truth moral values and principles There appears to be no attempt to discern what is beautiful and true it is functional and pragmatic usefulness that seem to dominate human evaluations and transactions with other humans and indeed animals Humanity is becoming detached from the higher aesthetic moral and intellectual works of the human spirit and thus the life of the spirit is often situated on the other side of a gulf opposed to science with its rationality Culture is in danger of becoming reduced to science In other words the great metaphysical questions those of telos of sense often are answered in terms of scientific conceptions But these are at least incomplete if not fragmentary and in principle hypothetical which still leaves the questions unanswered But it is culture that is the manifestation of the human spirit being the historical process of human self interpretation in existence All manifestations of the creative forge of the human being find a role in the fabric of culture which involves progressively widening circles of the human community demanding an integration and attunement with others in their changing conditions of life This consideration of culture involves all areas of philosophical reflection moral aesthetic metaphysical epistemological semiological cognitive and more

Foundations of Morality, Human Rights, and the Human Sciences Anna-Teresa Tymieniecka, Calvin O. Schrag, 2012-12-06

The essays in this volume constitute a portion of the research program being carried out by the International Society for Phenomenology and the Human Sciences Established as an affiliate society of the World Institute for Advanced Phenomenological Research and Learning in 1976 in Arezzo Italy by the president of the Institute Dr Anna Teresa Tymieniecka this particular society is devoted to an exploration of the relevance of phenomenological methods and insights for an understanding of the origins and goals of the specialised human sciences The essays printed in the first part of the book were originally presented at the Second Congress of this society held at Purdue University West Lafayette Indiana 12-14 July 1979 The second part of the volume consists of selected essays from the third convention the Eleventh International Congress of Phenomenology of the World Phenomenology Institute held in Cambridge Massachusetts in 1981 With the third part of this book we pass into the Human Rights issue as treated by the World Phenomenology Institute at the Interamerican Philosophy Congress held in Tallahassee Florida also in 1981 The volume opens with a monograph by Anna Teresa Tymieniecka on the foundations of ethics in the moral practice within the life world and the social world shown as clearly distinct The main ideas of this work had been presented by Tymieniecka as lead lectures to the three conferences giving them a tight research project consistency *Ontopoietic Expansion in Human Self-Interpretation-in-Existence* Anna-Teresa Tymieniecka, 2012-12-06 The societal web of life is underpinned by one concept that of Self and Other which emerged earlier in this century The concept has received a new formulation within the field of the phenomenology of life and the human

creative condition finding a foothold a point of reference that radiates novel seminal insights It is nothing other than the creative fulcrum of human functioning The self individualisation of the human being as revealed in the present collection is existentially and vitally intertwined with that of the Other Tymieniecka's seminal idea of the transactional is explored in this collection of essays which reveals a variety of significant perspectives weaving the cycles of the human universe of existence in an essential oscillation between the Self and the Other In this oscillation we throw out our existential tentacles trying to gain a living space with respect to each other all the while engaging in a mutual creative prompting and attunement

Evolution, Culture, and the Human Mind Mark Schaller, Ara Norenzayan, Steven J. Heine, Toshio Yamagishi, Tatsuya Kameda, 2011-03-17 Evolution Culture and the Human Mind is the first scholarly book to integrate evolutionary and cultural perspectives on human psychology The contributors include world renowned evolutionary cultural social and cognitive psychologists These chapters reveal many novel insights linking human evolution to both human cognition and human culture including the evolutionary origins of cross cultural differences The Ground and Goal of Human Life Charles Gray Shaw, 1919 The Human Origins Valentin Matcas, 2016-04-20 There is more to the human origins development intelligence and civilization than the epic debate Creationism versus Evolution simply because there is more to the human condition than what authorities and ideologies want you to believe Therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity's lifespan and achievement defining its specific timeline While you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates Since you want the accurate truth because you already know all theories beliefs speculations and debates regarding the human origins And this is why when you study the human origins you expect to understand everything about the origins of life the nature and origins of this world the nature of the human higher self and intelligence the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the Creator of this entire world of Life and of humanity Additionally it is relevant to know how all these affect you personally and how they affect your family your genetic line and your nation how your family and genetic line originate where and how it happened under what circumstances and with what status and privileges for you for your family for your nation and for the humankind And this is exactly what we cover throughout this book in all details and from all perspectives This book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of Earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model Human Caring Science Jean Watson, 2012 Rev ed of Nursing human science and human care Jean Watson c1999 **Human-Canine Collaboration in Care** Fenella Eason, 2019-10-16 Adopting an anthrozoological perspective to study the participation of non human animals in

regimes of care this book examines the use of canine scent detection to alert hypo unaware individuals to symptoms of human chronic illness Based on ethnographic research and interviews it focuses on the manner in which trained assistance dogs are able to use their sense of smell to alert human companions with Type 1 diabetes to imminent hypoglycaemic episodes thus reducing the risk of collapse into unconsciousness coma or at worst death Through analyses of participant narrations of the everyday complexities of doing diabetes with the assistance of medical alert dogs the author sheds light on the way in which each human canine dyad becomes acknowledged as a team of one in society Based on the concept of dogs as friends and work colleagues as animate instruments and biomedical resources the book raises conceptual questions surrounding the acceptable use of animals and their role within society As such this volume will appeal to scholars across the social sciences with interests in human animal interactions and intersections It may also appeal to healthcare practitioners and individuals interested in innovative multispecies methods of managing chronic illness

The Oxford Handbook of Process Philosophy and Organization Studies Jenny Helin,Tor Hernes,Daniel Hjorth,Robin Holt,2014-05-15 Process approaches to organization studies focus on flow activities and evolution understanding organizations and organizing as processes in the making They stand in contrast to positivist approaches that see organizations and phenomena as fixed static and measurable Process approaches draw on a range of ideas and philosophies The Handbook examines 34 philosophers and social theorists both those commonly linked to process thinking such as Whitehead Bergson and James and those that are not as often addressed from a process perspective such as Dilthey and Tarde Each chapter addresses the background and context of this thinker their work with a focus on the processual elements and the potential contribution to organization and management research For students and scholars in the field of Organization Studies this book is an entry point into the work of philosophical thinkers and social theorists for whom the world is far from being a solid place

Brahman Michael Myers,2013-09-13 This book is a critique of western systematic theology It borrows insights from India and other traditions it is not a synthesis of religious traditions The book includes two parts method and systematics It examines the traditional topics of systematic theology topics such as the existence and nature of God revelation and reason religious ethics and human practice the relation of God to the world Christology and eschatology and allows these topics to grow in conversation with India and to change according to dialogical insights The book is prompted by a perceived need to cross the boundaries between western and Indian worldviews in a systematic and comprehensive way The purpose of the book is to enable scholars worldwide to extend their theological resources and to look anew at the problems and prospects of a comparative systematic theology

Perceiving the Divine through the Human Body T. Cattoi,J. McDaniel,2011-11-07 Cattoi and McDaniel present a selection of articles on the role of the body and the spiritual senses our transfigured channels of sensory perceptions in the context of spiritual practice The volume investigates this theme across a variety of different religious traditions within Christianity Hinduism Buddhism and Daoism

Gods and Humans in the Ancient Near East Tyson L.

Putthoff,2020-11-05 In this book Tyson Putthoff explores the relationship between gods and humans and between divine nature and human nature in the Ancient Near East In this world gods lived among humans The two groups shared the world with one another each playing a special role in maintaining order in the cosmos Humans also shared aspects of a godlike nature Even in their natural condition humans enjoyed a taste of the divine state Indeed gods not only lived among humans but also they lived inside them taking up residence in the physical body As such human nature was actually a composite of humanity and divinity Putthoff offers new insights into the ancients understanding of humanity s relationship with the gods providing a comparative study of this phenomenon from the third millennium BCE to the first century CE **The Human**

Microbiome Rosamond Rhodes,Nada Gligorov,Abraham Paul Schwab,2013-08-15 The human microbiome is the bacteria viruses and fungi that cover our skin line our intestines and flourish in our body cavities Work on the human microbiome is new but it is quickly becoming a leading area of biomedical research What scientists are learning about humans and our microbiomes could change medical practice by introducing new treatment modalities This new knowledge redefines us as superorganisms comprised of the human body and the collection of microbes that inhabit it and reveals how much we are a part of our environment The understanding that microbes are not only beneficial but sometimes necessary for survival recasts our interaction with microbes from adversarial to neighborly This volume explores some of the science that makes human microbiome research possible It then considers ethical legal and social concerns raised by microbiome research Chapters explore issues related to personal identity property rights and privacy The authors reflect on how human microbiome research challenges reigning views on public health and research ethics They also address the need for thoughtful policies and procedures to guide the use of the biobanked human samples required for advancing this new domain of research In the course of these explorations they introduce examples from the history of biomedical science and recent legal cases that shed light on the issues and inform the policy recommendations they offer at the end of each topic s discussion This volume is the product of an NIH Human Microbiome Project grant It represents three years of conversations focused on consensus formation by the twenty seven members of the interdisciplinary Microbiome Working Group The microbiome is a relatively new area of medical attention Ethical issues related to the microbiome have barely been identified much less carefully analyzed This volume is an excellent start toward that ethical analysis Many of the arguments are persuasive and provocative In particular some contributors challenge the ethical need for anonymizing microbiome specimens as well as the need for individual informed consent for specific uses of these specimens I highly recommend this volume for all those interested in the microbiome and in new frontiers in medical ethics Leonard M Fleck Michigan State University **Rationality, Relativism and the Human Sciences** Joseph Margolis,Michael Krausz,R. Burian,1986-10-31 The Greater Philadelphia Philosophy Consortium was launched in the early eighties It began during a particularly lean period in the American economy But its success is linked as much to the need to be in touch with the rapidly changing currents of

the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced perhaps permanently with the threat of increasing attrition The member schools of the Consortium now include Bryn Mawr College the University of Pennsylvania Temple University and Villanova University that is the schools of the area that offer advanced degrees in philosophy The philosophy faculties of these schools form the core of the Consortium which offers graduate students the instructional and library facilities of each member school The Consortium is also supported by the associated faculties of other regional schools that do not offer advanced degrees notably those at Drexel University Haverford College La Salle University and Swarthmore College both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region The affiliated and core professionals now number several hundreds and the Consortium's various ventures have been received most enthusiastically by the academic community At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies

The Phenomenology of Man and of the Human Condition Anna-Teresa Tymieniecka, 2012-12-06

The Unity of Nature and History in Pannenberg's Theology Cornelius A. Buller, 1996 The Unity of Nature and History in Pannenberg's Theology addresses the problematic relationship of humans to the non human world by analyzing Wolfhart Pannenberg's theology and ethics

Love as Common Ground Paul S. Fiddes, 2021-09-23 This book explores the way in which the study and practice of love creates a common ground for different faiths and different traditions within the same faith For the contributors common ground in this context is not a minimal core of belief or a lowest common denominator of faith but a space or area in which to live together consider together the meaning of the love to which various faiths witness and work together to enable human flourishing Such a space the contributors believe is possible because it is the place of encounter with the divine This book is the fruit of a Project for the Study of Love in Religion which aims to create this space in which different traditions of love converge from Islam Judaism and the Christianity of both East and West Tools employed by the contributors in exploring this space of love include exegesis of ancient texts theology accounts of mystical experience philosophy and evolutionary science of the human Insights about human and divine love that emerge include its nature as a form of knowing its sacrificial and erotic dimensions its inclination towards beauty its making of community and its importance for a just political and economic life

The Owl and the Rooster Alan Brudner, 2017-10-19 Since 1945 there have been two waves of Anglo American writing on Hegel's political thought The first defended it against works portraying Hegel as an apologist of Prussian reaction and a theorist of totalitarian nationalism The second presented Hegel as a civic humanist critic of liberalism in the tradition of Rousseau The first suppressed elements of Hegel's thought that challenge liberalism's individualistic premises the second downplayed Hegel's theism This book recovers what was lost in each wave It restores aspects of Hegel's political thought unsettling to liberal beliefs yet that lead to a state more liberal than Locke's and Kant's which retain authoritarian elements It also scrutinizes Hegel's claim to have justified theism to rational insight hence

to have made it conformable to Enlightenment standards of admissible public discourse And it seeks to show how for Hegel the wholeness unique to divinity is realizable among humans without concession or compromise and what role philosophy must play in its final achievement Lastly we are shown what form Hegel s philosophy can take in a world not yet prepared for his science Here is Hegel s political thought undistorted

The Lost Human and the Real End of History George Yerby, 2025-07-01 This book analyses the transformation in 16th and 17th century English economic life that overturned the traditional restraints of the medieval economy for the commercial ethos that governs the modern world and the resulting imbalance which opened the way to the environmental breakdown of today On the open fields and commons the smallholders had worked closely with the land as given with minimal intervention in natural processes The 16th century introduced a fundamental difference of approach as the inducement of exceptional profits encouraged manipulative exploitation of the land Freedom of trade from arbitrary restraints and impositions became the new economic ethos officially established by the mid 17th century revolution and reinforced by other changes such as the emergence of the nationstate The rise of science was associated with the agriculturalist adoption of empirical method for improvement and a new philosophy accorded humankind the right to degrade other species for its own ends By focusing on the causes and effects of capitalism at its first appearance this volume traces the environmental crisis back to the switch from an essentially universalist to a basically individualist world This book will be of interest to scholars and students of Early Modern England Economic Studies and Environmental Studies

The Human Self Book Review: Unveiling the Power of Words

In a global driven by information and connectivity, the energy of words has are more evident than ever. They have the ability to inspire, provoke, and ignite change. Such is the essence of the book **The Human Self**, a literary masterpiece that delves deep in to the significance of words and their effect on our lives.
