presented for determining stability have been selected with reference to their applicability to small work and are not ordinarily to be found in works on naval architecture The various operations involved in designing a sailing yacht are illustrated in the text by work on the thirty foot water line sloop whose plans are given on plates I II III and IV This is intended to be a conventional rather than an ideal design and was chosen on account of its suitability for purposes of illustration The complete data on this design is given in the appendix The author is indebted to Prof C H Peabody of the Massachusetts Institute of Technology for criticism and suggestion About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
