Kummer, 2002 **Slow Food** Carlo Petrini, 2004-10-06 Discusses the history and spread of the International Slow Food Movement which was sparked in 1986 when Carlo Petrini organized a protest against plans to build a McDonald's fast food restaurant near the Spanish Steps in Rome and discusses the movement's goals of preserving indigenous foods and eating traditions and returning to dining as a social event **Making Slow Food Fast in California Cuisine** Victor W.

Geraci, 2017-03-02 This book follows the development of industrial agriculture in California and its influence on both regional and national eating habits Early California politicians and entrepreneurs envisioned agriculture as a solution to the food needs of the expanding industrial nation The state's climate geography vast expanses of land water and immigrant workforce when coupled with university research and governmental assistance provided a model for agribusiness In a short time the San Francisco Bay Area became a hub for guaranteeing Americans access to a consistent quantity of quality foods To this end California agribusiness played a major role in national food policies and subsequently produced a bifurcated California Cuisine that sustained both Slow and Fast Food proponents Problems arose as mid twentieth century social activists battled the unresponsiveness of government agencies to corporate greed food safety and environmental sustainability By utilizing multidisciplinary literature and oral histories the book illuminates a more balanced look at how a California Cuisine embraced Slow Food Made Fast **We Are What We Eat** Alice Waters, 2021-06-01 From chef and food activist Alice

Waters an impassioned plea for a radical reconsideration of the way each and every one of us cooks and eats In We Are What We Eat Alice Waters urges us to take up the mantle of slow food culture the philosophy at the core of her life's work When

Waters first opened Chez Panisse in 1971 she did so with the intention of feeding people good food during a time of political turmoil Customers responded to the locally sourced organic ingredients to the dishes made by hand and to the welcoming hospitality that infused the small space human qualities that were disappearing from a country increasingly seduced by takeout frozen dinners and prepackaged ingredients Waters came to see that the phenomenon of fast food culture which prioritized cheapness availability and speed was not only ruining our health but also dehumanizing the ways we live and relate to one another Over years of working with regional farmers Waters and her partners learned how geography and seasonal fluctuations affect the ingredients on the menu as well as about the dangers of pesticides the plight of fieldworkers and the social economic and environmental threats posed by industrial farming and food distribution So many of the serious problems we face in the world today from illness to social unrest to economic disparity and environmental degradation are all at their core connected to food Fortunately there is an antidote Waters argues that by eating in a slow food way each of us like the community around her restaurant can be empowered to prioritize and nurture a different kind of culture one that champions values such as biodiversity seasonality stewardship and pleasure in work This is a declaration of action against fast food values and a working theory about what we can do to change the course As Waters makes clear every decision we make about what we put in our mouths affects not only our bodies but also the world at large our families our communities and our environment We have the power to choose what we eat and we have the potential for individual and global transformation simply by shifting our relationship to food All it takes is a taste
