Slowing Down In A Speeded Up World:

Slowing Down in a Speeded-Up World Lara Adair, 1994 It seems the more we get done the more there is to do and though modern conveniences offer a faster way of doing things they have also taken away the serenity of daily life San Francisco Chronicle columnist Lara reveals ways in which people manage to find peace in the midst of their tumultuous lives Line drawings

Slowing Down to Run Faster Edward Yu, 2020-06-30 A trainer and former triathlete shows you how to achieve the results you want with a new multidisciplinary approach Why does trying harder sometimes become an exercise in futility Why does following expert advice often lead to little or no improvement What if there were an efficient way of learning that could be applied to every area of human experience Drawing from the principles of Bagua Taichi and Feldenkrais Edward Yu presents an innovative approach to running power speed and agility are more related to your ability to sense your own body than to willpower or raw talent Centering the art of running as an explorative creative and somatic based practice Yu shows us how to run faster by learning to become more sensible that is more sense able through the playful and systematic exploration of movement

Planning Australia's Healthy Built Environments Jennifer Kent, Susan Thompson, 2019-03-18 Planning Australia's Healthy Built Environments shines a quintessentially Australian light on the links between land use planning and human health A burgeoning body of empirical research demonstrates the ways urban structure and governance influences human health and Australia is playing a pivotal role in developing understandings of the relationships between health and the built environment This book takes a retrospective look at many of the challenges faced in pushing the healthy built environment agenda forward It provides a clear and theoretically sound framework to inform this work into the future With an emphasis on context and the pursuit of equity Jennifer L Kent and Susan Thompson supply specific ways to better incorporate idiosyncrasies of place and culture into urban planning interventions for health promotion By chronicling the ways health and the built environment scholarship and practice can work together Planning Australia's Healthy Built Environments enters into new theoretical and practical debates in this critically important area of research This book will resonate with both health and built environment scholars and practitioners working to create sustainable and health supportive urban environments

The Realities of 'Reality' - Part III: Impacts of Speed and Time Optimization on Reality Fritz Dufour, MBA, DESS, 2019-08-28 The main theme of this book is the impacts of speed and time optimization on reality or more precisely on our modern society But first it sets the background by exploring the physics behind the concepts of speed and time how they came about how we became aware of them and how did the new world of speed emerge and why does it seem to be inescapable It explores the speed of light and the speed of sound by linking them to our environment It introduces the notion of Arrow of time or entropy which grows from the past to the present is expected to keep growing in the future and hypothesizes that this is perhaps why our craving for speed and time optimization is here to stay with no end in sight An important point discussed is that because of memories and experiences

people may choose to live either in the past present or future which leads to the notions of presentism and eternalism The book argues that while for presentists only the present is real for eternalists both the past present and future are equally real The book makes the case about speed and time optimization as a legacy of modernity by laying out the differences between modernism modernization and modernity itself It shows how modernity is all about the now or the present rather than the past and how as such it s all about the new So then the changes that are now happening in our modern world can be traced back to a segment of history that dates back to the beginning of modernity that is which began with the Protestant Reformation and is now rapidly approaching closure in the world of today s extreme finance It argues about the technological implications of speed and time in the 21st century It shows how technology has become an integral part of human existence and that it is inconceivable one can even think of escaping it This Part III of the series shows the link between high speed trading and faster connectivity and faster computers It shows how thanks to the Internet information became freely accessible and is spreading faster and faster It shows how supercomputers not only allow people to address the biggest and most complex problems they also allow people to solve problems faster even those that could fit on servers or clusters of PCs This rapid time to solution is critical in some aspects of emergency preparedness and national defense where the solutions produced are only valuable if they can be acted on in a timely manner Finally the social and psychological implications of speed and time in the 21st century are also addressed by considering the upside and the downside of moving fast meaning leading a fast paced life The argument presented in the book is based on the analysis and the importance of stress in our daily lives and also explains the notion of chronobiology Our biological clocks drive our circadian rhythms An interesting point is that blind people may not perceive time the same way as the non blind Furthermore the book shows how we perceive time differently as we age compared to when we were young It also makes the case for the perception of time in dreams and in real life Speed and time optimization may be deceiving according to this Part III of the series This can be proven by questions such as 1 Is going over the speed limit really worth it and 2 Is the saying Slow down to go faster a paradox *The Alchemy of Illness* Kat Duff,1993 Illness is a universal experience There is no privilege that can make us immune to its touch We are taught to assume health illnesses being just temporary breakdowns in the well oiled machinery of the body But illness has its own geography its own laws and commandments At a time when the attention of the whole nation is focused on health care Kat Duff inquires into the nature and function of illness itself Duff a counselor in private practice in Taos New Mexico wrote this book out of her experience with chronic fatigue syndrome but what she has to say is applicable to every illness and every one of us For those who are sick this book offers solace and recognition For those who care for them either physically or emotionally it offers inspiration and compassion Finally this fresh perspective on healing reveals how every illness is a crucible that tries our mettle tests our limits and provides us with an unparalleled opportunity to integrate its lessons into our lives **Popular Electricity and the World's Advance** Henry Walter Young,1912 **759 Explicit Activators to**

The Sacred Art of Slowing Down A. C. Seiple, MA, LCMHC, 2025-09-09 We were created for so much more than rushing through life It s easy for everything in our lives to seem fine on the surface But deep down inside there s often another story at play one of overwhelm stress and heartache of finding ourselves stuck in old patterns Rather than feeling the weight of it all it s easier to spend our days on autopilot ignoring the noise inside But what if the peace and relief we most long for comes from tuning in with what s happening inside instead of tuning it out Join therapist Anna Christine A C Seiple on a compassionate mindful exploration of the depths of our souls With gentleness wisdom and expertise A C invites us to connect with our body and get curious about the spaces within that feel most stuck and find where we need safety attunement and care Rather than a prescriptive how to guide The Sacred Art of Slowing Down offers unique therapeutic prompts and contemplative reflections to help us cultivate new rhythms to work with what s happening inside rather than feeling like we re working against ourselves holistically explore the cognitive emotional spiritual and somatic strands of ourselves connecting with and honoring the whole of our created being become more comfortable with being instead of getting caught up in doing through experiential exercises embrace God s tender compassion and care especially for the most wounded parts of us When we slow down to connect with the depths of our being we are able to move through life in freer more wholehearted and whole bodied ways May these pages be a sacred space for all parts of us to be seen held and nourished
