Sm Pasts:

Unsettled Pasts Sarah Carter, 2005 The traditional mythology of the West is dominated by male images the fur trader the Mountie the missionary the miner the cowboy the politician the Chief Unsettled Pasts Reconceiving the West claims to re-examine the West through women's eyes It draws together contributions from researchers scholars and academic and community activists and seeks to create dialogue across geographic cultural and disciplinary boundaries Ranging from scholarly essays to poetry these pieces offer the reader a sample of some of today's most innovative approaches to western Canadian women's history several of the themes that run throughout the volume have only recently been critically addressed By rewriting the West from the perspective of women the contributors complicate traditional narratives of the region's past by contesting historical generalizations thus transcending the myths and frontier legacies that emerged out of imperial and masculine priorities and perspectives With Contributions by Kristin Burnett Cristine Georgina Bye Sarah Carter Mary Leah De Zwart Lesley A Erickson Cheryl Foggo Nadine I Kozak Siri Louie Graham A Macdonald Florence Melchior Patricia A Roome Eliane Leslau Silverman Olive Stickney Aritha Van Herk Muriel Stanley Venne Cora J Voyageur Preserving History Scott Monroe Waring, 2011-06-01 What and how to teach in the K 16 classroom history has been a perennial and at times heated debate Beginning as early as 1892 the question of what knowledge is of the most worth and what should be the central function of the history curriculum became a focus of many interested in education It was felt that the teachers needed to move away from traditional methods of teaching history such as rote memorization and the dry and lifeless system of instruction by textbook and find new and engaging ways to broaden and cultivate the mind Unfortunately these recommendations faced many critics and did not take hold in K 16 classrooms at this time or frankly at any point since then Even though we tend to have a nostalgic memory of earlier time periods and in turn the educational capabilities of the children from various times in our nation's past the results from multiple studies examining the historical knowledge base of America's youth has remained fairly discouraging Much of the lack of knowledge present stems from the manner in which history is traditionally taught Ineffective instructional methods greatly impact the interest levels or more frequently the distaste generated for learning about historical content and thus the public's corresponding perception of the importance of history within K 16 curricula This book makes an effort at overcoming the persistent boredom and lack of historical knowledge present in our students by focusing on ways in which history instruction can be improved , **New Italian and English Dictionary in Two Parts** F. Brophy,Bruce VanSledright,1997-01-01 In clear concise language this book deals with fundamental issues that must be addressed if teachers are to construct coherent and powerful history curricula including What are the purposes and goals that different types of teachers establish for their history teaching and What do

children know and think about history and what are the teaching implications for our schools This book represents a major advance in developing a knowledge base about children s historical learning and thinking that applies to history teaching some of the principles involved in teaching for understanding and conceptual change teaching methods that have been so successful in other school subjects

The Sun Recorded Through History J.M. Vaquero, M. Vázquez, 2009-04-21 The Sun is nowadays observed using different techniques that provide an almost instantaneous 3 D map of its structure Of particular interest is the study of the variability in the solar output produced by the dissipation of magnetic energy on different spatial and temporal scales the so called magnetic activity The 11 year cycle is the main feature describing this phenomenon Apart from its intrinsic scientific interest this topic is worth studying because of the interaction of such processes with the terrestrial environment A fleet of space and ground based observatories are currently monitoring the behaviour of our star on a daily basis However solar activity varies not only on this decadal time scale as has been attested mainly through two methods a records of the number of sunspots observed on the solar surface from 1610 and b the records of ^{14}C and ^{10}Be cosmogenic isotopes measured in tree rings and ice cores respectively The study of the long term behaviour of solar activity may be complemented by the study of historical accounts describing phenomena directly or indirectly related to solar activity Numerous scientific and non scientific documents have reported these events and we can make use of them as a proxy of solar activity in past times
