in Group Communication Lawrence R. Frey, 2002 New Directions in Group Communication takes as its mission the setting of the agenda for the study of group communication in the future. It does so by presenting work that scholars have not previously explored in the current small group communication literature. Part I focuses on new theoretical and conceptual directions both presenting new views and extending current positions. Part II examines new research methodologies while Part III looks at antecedent factors affecting group communication. Parts IV and V of the text provide insight into both group communication process and practices. Part VI covers different group communication contexts including communication patterns in top management teams. *The Handbook of Group Communication Theory and Research* Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication's 50 year history. With contributions from the most experienced and respected scholars in the field, the editors Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize, and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners, and students alike.
