Structural Sensing, Health Monitoring, and Performance Evaluation D. Huston,2010-09-21 Structural health monitoring SHM uses one or more in situ sensing systems placed in or around a structure providing real time evaluation of its performance and ultimately preventing structural failure Although most commonly used in civil engineering such as in roads bridges and dams SHM is now finding applications in other engineering envir **Smart Nondestructive Evaluation for Health Monitoring of Structural and Biological Systems** ,2002 **The Geometry of Uncertainty** Fabio Cuzzolin,2020-12-17 The principal aim of this book is to introduce to the widest possible audience an original view of belief calculus and uncertainty theory In this geometric approach to uncertainty uncertainty measures can be seen as points of a suitably complex geometric space and manipulated in that space for example combined or conditioned In the chapters in Part I Theories of Uncertainty the author offers an extensive recapitulation of the state of the art in the mathematics of uncertainty This part of the book contains the most comprehensive summary to date of the whole of belief theory with Chap 4 outlining for the first time and in a logical order all the steps of the reasoning chain associated with modelling uncertainty using belief functions in an attempt to provide a self contained manual for the working scientist In addition the book proposes in Chap 5 what is possibly the most detailed compendium available of all theories of uncertainty Part II The Geometry of Uncertainty is the core of this book as it introduces the author s own geometric approach to uncertainty theory starting with the geometry of belief functions Chap 7 studies the geometry of the space of belief functions or belief space both in terms of a simplex and in terms of its recursive bundle structure Chap 8 extends the analysis to Dempster s rule of combination introducing the notion of a conditional subspace and outlining a simple geometric construction for Dempster s sum Chap 9 delves into the combinatorial properties of plausibility and commonality functions as equivalent representations of the evidence carried by a belief function then Chap 10 starts extending the applicability of the geometric approach to other uncertainty measures focusing in particular on possibility measures consonant belief functions and the related notion of a consistent belief function The chapters in Part III Geometric Interplays are concerned with the interplay of uncertainty measures of different kinds and the geometry of their relationship with a particular focus on the approximation problem Part IV Geometric Reasoning examines the application of the geometric approach to the various elements of the reasoning chain illustrated in Chap 4 in particular conditioning and decision making Part V concludes the book by outlining a future complete statistical theory of random sets future extensions of the geometric approach and identifying high impact applications to climate change machine learning and artificial intelligence The book is suitable for researchers in artificial intelligence

statistics and applied science engaged with theories of uncertainty The book is supported with the most comprehensive bibliography on belief and uncertainty theory **Health Monitoring and Smart Nondestructive Evaluation of Structural and Biological Systems** ,2006 **DPSM for Modeling Engineering Problems** Dominique Placko,Tribikram Kundu,2007-07-09 This book is the first book on this technique it describes the theory of DPSM in detail and covers its applications in ultrasonic magnetic electrostatic and electromagnetic problems in engineering For the convenience of the users the detailed theory of DPSM and its applications in different engineering fields are published here in one book making it easy to acquire a unified knowledge on DPSM **Prognostics and Health Management of Electronics** Michael G. Pecht,2008-09-11 The first book on Prognostics and Health Management of Electronics Recently the field of prognostics for electronic products has received increased attention due to the potential to provide early warning of system failures forecast maintenance as needed and reduce life cycle costs In response to the subject s growing interest among industry government and academic professionals this book provides a road map to the current challenges and opportunities for research and development in Prognostics and Health Management PHM The book begins with a review of PHM and the techniques being developed to enable a prognostics approach for electronic products and systems building on this foundation the book then presents the state of the art in sensor systems for in situ health and usage monitoring Next it discusses the various models and algorithms that can be utilized in PHM Finally it concludes with a discussion of the opportunities in future research Readers can use the information in this book to Detect and isolate faults Reduce the occurrence of No Fault Found NFF Provide advanced warning of system failures Enable condition based predictive maintenance Obtain knowledge of load history for future design qualification and root cause analysis Increase system availability through an extension of maintenance cycles and or timely repair actions Subtract life cycle costs of equipment from reduction in inspection costs down time and inventory Prognostics and Health Management of Electronics is an indispensable reference for electrical engineers in manufacturing systems maintenance and management as well as design engineers in all areas of electronics

Handbook of Structural Life Assessment Raouf A. Ibrahim, 2017-03-29. This important self contained reference deals with structural life assessment, SLA and structural health monitoring, SHM in a combined form. SLA periodically evaluates the state and condition of a structural system and provides recommendations for possible maintenance actions or the end of structural service life. It is a diversified field and relies on the theories of fracture mechanics, fatigue damage process and reliability theory. For common structures their life assessment is not only governed by the theory of fracture mechanics and fatigue damage process but by other factors such as corrosion, grounding and sudden collision. On the other hand, SHM deals with the detection, prediction and location of crack development online. Both SLA and SHM are combined in a unified and coherent treatment.
