The Practical Real-Time Enterprise Bernd Kuglin, 2005-02-21 The basic idea of the real time enterprise is to become quicker. A business which wants to become a real time enterprise has to acquire three main abilities. Internal and external data is integrated quickly and in real time in a well organized company data pool. Analyses of information in the company data pool can be obtained in real time across function boundaries and at the touch of a button. The number of working steps performed in batch mode is shifting dramatically in favor of immediate completion in real time. The issue of communications or real time communications plays a special role here. Studies have shown that processing times sometimes double when necessary communication events are handled in batch mode in the business process and not in real time. In other words when an activity cannot be completed and lies around for days because an urgently needed partner cannot be contacted. The necessity of acquiring these three abilities has implications for the process related technical and organizational aspects of a business that are dealt with in detail in this book. *The Ventilator Project* Srikant Sastri, Amitabha

Bandyopadhyay, 2021-03-07 A raging pandemic a dearth of life saving equipment and ninety days to manufacture a world class ventilator. On 24 March 2020 a nationwide lockdown was imposed in India in the face of a formidable adversary the Covid 19 pandemic. With the number of cases increasing exponentially hospitals were faced with a dangerous shortage of life saving equipment and personnel. In response to the imminent crisis Amitabha Bandyopadhyay and Srikant Sastri formed the IIT Kanpur ventilator Consortium as a task force to assist a young startup Nocca Robotics in building affordable high quality ventilators for India's cash strapped hospitals. Under the mentorship of reputed industry leaders the task force and the Nocca team worked tirelessly against unprecedented odds trammelled by a ban on imports and telecommuting through Zoom and Whatsapp in the face of stringent lockdown restrictions to manufacture the Noccarc V310 in record time. This is the incredible story of its conception creation and success in the words of the task force co leaders themselves. Inspiring and riveting. The Ventilator Project also offers an unmatched blueprint for business in the post Covid era through first hand

lessons gleaned during the task force's phenomenal ninety day run. It proves that India with its deep recesses of talent and ingenuity has the potential to be a world leader in both business and social impact. **Computerworld**, 1999-08-09.
