Allen,Victor Leonard Allen,1975 Social analysis Victor Leonard Allen,1975 **Sociological Paradigms and Organisational Analysis** Gibson Burrell,Gareth Morgan,2017-03-02 The authors argue in this book that social theory can usefully be conceived in terms of four broad paradigms based upon different sets of meta theoretical assumptions with regard to the nature of social science and the nature of society The four paradigms Functionalist Interpretive Radical Humanist and Radical Structuralist derive from quite distinct intellectual traditions and present four mutually exclusive views of the social work Each stands in its own right and generates its own distinctive approach to the analysis of social life The authors provide extensive reviews of the four paradigms tracing the evolution and inter relationships between the various sociological schools of thought within each They then proceed to relate theories of organisation to this wider background This book covers a great range of intellectual territory It makes a number of important contributions to our understanding of sociology and organisational analysis and will prove an invaluable guide to theorists researchers and students in a variety of social science disciplines It stands as a discourse in social theory drawing upon the general area of organisation studies industrial sociology organisation theory organisational psychology and industrial relations as a means of illustrating more general sociological themes In addition to reviewing and evaluating existing work it provides a framework for appraising future developments in the area of organisational analysis and suggests the form which some of these developments are likely to take **Sociology and Organization Theory** John Hassard,1995-04-06 It has been claimed that organization theory is in a state of crisis This book traces the history of the orthodox systems theory paradigm in organization studies from its foundations to its recent deconstruction by postmodernists The analysis offers general support for the sociology in crisis thesis but takes issue with one of its main propositions that paradigms are incommensurable It is argued that paradigms are porous rather than hermetic phenomena a fact that has profound implications for the theory building process **Class, Politics and the Economy (Routledge Revivals)** Stewart Clegg,Paul Boreham,Geoff Dow,2014-11-06 This study first published in 1986 provides a systematic account of the processes and structure of class formation in the major advanced capitalist societies The focus is on the organizational mechanisms of class cohesion and division theoretically deriving from a neo Marxian perspective Chapters consider the organization and structure of the corporate ruling class the middle class and the working class and are brought together in an overarching analysis of the organization of class in relation to the state and the economy This title will be of particular interest to students researching the impact of recession on societal structure and the processes of political class struggle as well as those with a more general interest in the socio economic theories of Marx Engels and Weber Routledge Library Editions: Development Mini-Set M: Theories of Development Various,2021-11-17 Routledge Library Editions Development will re issue works which address economic political and social aspects of development

Theories of Development Peter Preston, 2012-12-06 Dr Preston's book first published in 1982 presents a critical history of development studies since the Second World War linking the recent neo Marxist debate with the whole tradition in the field going back to the work of economists like Arthur Lewis He identifies a series of schools and evaluates their contribution supplying in each case a careful analysis informed by the sociology of knowledge of the work of its leading theorists His final assessment draws on the critical theory of Habermas arguing that social theorising is essentially practical a matter of the construction criticism and comparative ranking of ideologies and that theorists should therefore consider what it makes sense for them to do or say given their circumstances and the problems they address

Power, Ideology, and Control John C. Oliga, 2007-08-20 One of the great challenges we face today is coming to grips with forces of power in both theoretical and methodological terms in a way that prepares us for action action that is not totally subject to existing forces The literature has some excellent theoretical

accounts of power but these say little about what we should do Most often they are abstract and out of reach of all but a select few In this book however we have a clear cut account of power ideology and control that paves the way for practic minded people to make a genuine attempt at tackling issues of power on both organizational and societal levels John C Oliga suggests a division between what he calls objectivist subjectivist and relational perspectives With objectivism he refers to theories that focus on power as capacities located in social structures These tend to be either synergistic e g Parsonian collective or conflictual e g Marxian conflictual view theoretical orientations With subjectivism he discusses theories that focus on power possessed by agents With rela tional approaches he places theories that conceive power as a property of interaction among social forces

Society in Action Piotr Sztompka,1991-08-27 In Society in Action Piotr Sztompka sets forth a highly topical contribution to central theoretical

debates of contemporary sociology Taking the idea and practice of collective mobilization as his theme Sztopka argues that modern institutions particularly of late are characterized by an increasing awareness of collective empowerment The most obvious concrete expression of this phenomenon as Sztopka makes clear is the rise of a diversity of active social movements such as those which dramatically transformed Europe in the 1980s from the birth of Solidarity in 1980 to the 1989 Autumn of Nations Sztopka connects the interpretations of such collective activity to a wider grasp of the nature of social action The result is a comprehensive and original theory of social change which focuses on the self transforming influence on society of its members striving for freedom autonomy and self fulfillment He develops his theory by means of a general concept of social becoming the roots of which he traces to the early romantic and humanist work of Karl Marx and his followers and to two influential sociological schools of today the theory of agency and historical sociology Sztopka situates his theory midway between the rigid determinism of social totalities and the unbridled voluntarism of free individuals Social change he demonstrates can be understood neither as the outcome of individual actions taken alone nor as structurally determined actions Instead he confers upon social organizations and movements a self transcending quality they express human agency yet by virtue of their active character are quite often able to achieve unpredictable outcomes Throughout his analysis of social movements and revolutions in history Sztopka emphasizes the dynamics of spontaneous social change generated from below a theoretical testimony to the rapid and fundamental social change in Eastern Europe in recent history Against the fashions of postmodernist malaise boredom and disenchantment his theory of social becoming expresses the possibility of emancipation of change leading to positive gains His work registers a belief in progress not inevitably gained but its attainment fully dependent upon the creativity and optimism of an active citizenry
