Understanding Modern Societies , China's Literary and Cultural Scenes at the Turn of the 21st Century Jie Lu, 2013-10-18 China's literary and cultural production at the turn of the twenty first century is marked by heterogeneity plurality and diversity Given its complexity the literary cultural production of this period perhaps can be understood most productively as a response to a global modernity that has touched and transformed all aspects of contemporary Chinese reality The eleven essays in this book offer an introduction to some of the most important works published at the turn of the twenty first century In combining textual analysis of specific works with theoretical insights and in locating the texts in their sociocultural and socioeconomic contexts the essays explore key theoretical issues and intellectual concerns of the time They collectively draw a broad contour of new developments major trends and radical changes capturing the intellectual and cultural Zeitgeist of the age All in all these essays offer new theoretical approaches to and critical perspectives on contemporary Chinese literature and culture Historical Developments and Theoretical Approaches in Sociology - Volume II Charles Crothers , 2010-11-30 Historical Developments and Theoretical Approaches in Sociology in two volumes is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias Sociology is one of several social science disciplines and smaller bodies of knowledge which seeks to understand the patterns in social life There is a broad congruence between the objective configurations of social life and the components of the disciplines studying them the body of sociological knowledge is socially constructed and the pathways to its gaining of knowledge influenced by a variety of factors Moreover since social life is ever changing sociology often has to scramble to catch up with the changing social world This work is built up around four broad topics the first providing important shared contextual material and then followed by three broad levels of social analysis with each of these four parts containing a number of chapters with more specific and in depth information The theme essay provides a general introduction and overview of the theme as a whole In total the work holds 40 contributions written by a selection of many international renowned specialists from 12 countries It was important to obtain a wide range of viewpoints giving the ways in which social issues arise quite differently in a range of countries These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs **An Anthology of African Cultural Studies, Volume I** Keyan G. Tomaselli, Handel Kashope Wright, 2024-10-04 This volume provides an overview of fundamental or grounding themes in African Cultural Studies including the articulation of African cultural studies the issue of Africa's diaspora's African identity and identifications and media studies in Africa and its relationship with cultural studies The first of two volumes the book predominantly pulls together a rich reservoir of previously published articles from Critical

Arts South North Cultural and Media Studies mapping a long history of the field that draws from a diverse range of origins and locations especially from within Africa itself The first section of the book addresses how African cultural studies has been called for and explained both as a comprehensive continental and sometimes national discourse and as being in conversation with established global cultural studies The second section addresses the African diaspora and what might be termed diasporic African cultural studies A third principal theme explored is how African identities and identifications are articulated in African cultural studies On spatiality the volume takes a stance on the exclusive continental versus continuity conception of Africa the African diaspora is treated as contributory and its relationship to the continent as problematic while taking up continental Africa as the principal location of African cultural studies In terms of identity Blackness is taken up as the dominant but importantly not exclusive racial identity and identification of African cultural studies and gender and social class are also addressed in novel ways The book ends with an examination of the complex relationship between media studies and cultural studies This book will be a key resource for academics researchers and advanced students of African cultural studies media and cultural studies African studies history politics sociology and social and cultural anthropology while also being of interest to those seeking an introduction to the sub field of African cultural studies

Indigenous Shona Philosophy Pascah Mungwini,2017-12-29 Some of the most provocative questions confronting philosophers in Africa are grounded in the historical memory of conquest and the peripheralisation the continent Mungwini offers a critical reconstruction of indigenous Shona philosophy as an aspect of the African intellectual heritage held hostage by colonial modernity In this comprehensive work he lays bare the thoughts of the Shona who are credited with the founding of the ancient Great Zimbabwe civilisation Retracing the epistemic thread in the fabric of Shona culture and philosophy he explores the assumptions that inform their thinking The exchange of such knowledge is fundamental to the future of humanity

The New Wealth of Cities John Montgomery,2017-09-29 Over the past two decades city economies have restructured in response to the decline of older industries This has involved new forms of planning and urban economic development a return to traditional concerns of city building and a focus on urban design During this period there has also been a marked rise in our understanding of cultural development and its role in the design

economy and life of cities In this book John Montgomery argues that this amounts to a shift in urban development He provides a long overdue look at the dynamics of the city that is how cities work in relation to the long cycles of economic development and suggests that a new wave of prosperity built on new technologies and new industries is just getting underway in the Western world The New Wealth of Cities focuses on what effect this will have on cities and city regions and how they should react Original and wide ranging this book will be a definitive resource on city economies and urban planning explaining why it is that cities develop over time in periods of propulsive growth and bouts of decline

Handbook of Historical Sociology Gerard Delanty, Engin F Isin, 2003-06-03 The overall conception of the volume is absolutely splendid and the editors skilfully place the material in the context of disciplinary and post disciplinary developments in sociology This is a major contribution to the field as well as a comprehensive and reliable guide to its main components William Outhwaite Professor of Sociology School of European Studies University of Sussex It is hard to think of anything that has been left out in this masterly survey of contemporary historical sociology The editors have done a superb job in the selection of both themes and contributors We now at last have an up to date book to assign in our graduate courses on comparative historical sociology There s really nothing else like it out there The editors introduction is one of the best things I have read on how the field developed and the problems it has encountered Krishan Kumar William R Kenan Jr Professor of Sociology University of Virginia The range of topics covered and the number of distinguished scholars who have contributed to the handbook is impressive with leading figures such as Bryan S Turner John R Hall Gianfranco Poggi and Craig Calhoun among the contributors to a book that covers areas as diverse as post colonial historiography and the historical sociology of the city the handbook fills a void within the sizable literature on historical sociology and undoubtedly will be a useful addition to graduate reading lists The British Journal of Sociology What is important in historical sociology What are the main routes of development in the subject This Handbook consists of 26 chapters on historical sociology It is divided into three parts Part One is devoted to Foundations and covers Marx Weber evolutionary and functionalist approaches the Annales School Elias Nelson and Eisenstadt Part Two moves on to consider major approaches such as modernization approaches late Marxist approaches historical geography institutional approaches cultural history intellectual history postcolonial and genealogical approaches The third part is devoted to the major substantive themes in historical sociology ranging from state formation nationalism social movements classes patriarchy architecture religion and moral regulation to problems of periodization and East West divisions Each part includes an introduction that summarizes and contextualizes chapters A general introduction to the volume outlines the current situation of historical sociology after the cultural turn in the social sciences It argues that historical sociology is deeply divided between explanatory sociological approaches and more empirical and interpretative historical approaches Systematic and informative the book offers readers the most complete and authoritative guide to historical sociology
