Social Behavior Natural Resources And The Environment:

Social Behavior, Natural Resources, and the Environment William R. Burch, Neil H. Cheek, Lee Taylor, 1972 Collection of papers on sociological aspects of ecology with particular reference to issues relating to the unfolding relationship between man's social behaviour the environment and natural resources in the USA indicates that in human dominated ecosystems the biological crises must first be converted into social problems before they have relevance to the social system provides a theoretical overview and suggests some promising lines for future research References and statistical tables

Behavior and the Natural Environment Irwin Altman, Joachim F. Wohlwill, 2012-12-06 The theme of the present volume concerns people's response to the natural environment considered at scales varying from that of a house hold plant to that of vast wilderness areas Our decision to focus on this particular segment of the physical environment was prompted in part by the intrinsic interest in this subject on the part of a diverse group of social scientists and professionals and of laypersons for that matter and in part by the relative neglect of this topic in standard treatments of the environment behavior field It also serves to bring out once again the interdisciplinary nature of that field and we are pleased to have been able to include representatives from geography sociology social ecology and natural recreation among our contributors We believe that this volume will serve a useful purpose in helping to integrate the findings and concepts in this presently somewhat fragmented field scattered as they are over a very diverse array of publications representing a similarly varied group of specialties It is hoped that the result will be to stimulate future development of this area and to add a measure of increased coherence to it Volume 7 of our series will be devoted to the theme of elderly people and the environment with M Powell Lawton joining us as guest co editor The titles of the papers comprising Volume 7 are shown on page v Irwin Altman Joachim F Wohlwill ix Contents Introduction
