Youth Delinquency in Southeast Asia Jason Hung, 2023-09-14 Analysing the causes and effects of a variety of youth delinquent behaviours both digital and conventional this book aligns insightful sociological inquiry with an ongoing regional phenomenon **AIDS in America** Susan Hunter, 2025-09-23 With more than one million people currently infected and half a million already dead the U S ranks among the top ten most severe AIDS epidemics in the world Americans should know more about the current state of the epidemic so they can protect themselves and demand that the government act responsibly to reduce the danger of HIV in this country Hunter exposes the ways in which the U S shamefully resembles a developing country and the many fronts on which the government has failed to control the spread of the disease In this startling book she also shows what we must do to change the future of AIDS **Ready or Not** Kay S. Hymowitz, 2008-06-30

Children today grow up so fast How often we hear those words uttered both in frustrated good humor and in dumbfounded astonishment Every day the American people hear about kids doing things both good and bad that were once thought to be well beyond their scope flying airplanes running companies committing mass murder Creatures of the information age today s children sometimes seem to know more than their parents They surf the Internet rather than read books they watch South

Park instead of The Cosby Show they wear form fitting capri pants and tank tops instead of sundresses in short they are sophisticated beyond their years These facts lead us to wonder Is childhood becoming extinct In Ready or Not Kay S Hymowitz offers a startling new interpretation of what makes our children tick and where the moral anomie of today s children comes from She reveals how our ideas about childrearing itself have been transformed perniciously in reponse to the theories of various experts educators psychologists lawyers media executives who have encouraged us to view children as small adults autonomous actors who know what is best for themselves and who have no need for adult instruction or supervision Today s children and teenagers have been encouraged by their parents and teachers to function as individuals to such an extent that they make practically every decision on their own what to wear what to study and even what values they will adhere to The idea of childhood as a time of limited competence in which adults prepare the young for maturity has fallen into disrepute independence has become not the reward of time but rather something that our children have come to expect and demand at increasingly younger ages One of the great ironies of turning our children into small adults is that American society has become less successful at producing truly mature men and women When sophisticated children do grow up they often find themselves unable to accept real adult responsibilities Thus we see more people in their twenties and thirties living like children unwilling to embark on careers or to start families Until we recognize that children are different from grownups and need to be nurtured as such Hymowitz argues our society will be hollow at its core *Handbook of Child and Adolescent Aggression* Tina Malti, Kenneth H. Rubin, 2018-09-26 Aggressive behavior during childhood and adolescence is an important risk factor for later serious and persistent adjustment problems in adulthood including criminal behavior school dropout as well as family related and economic problems Researchers have thus deployed considerable efforts to uncover what drives individuals to attack and hurt others Each chapter explores the issue of aggression with an introduction theoretical considerations measures and methods research findings implications and future directions

Family and HIV/AIDS Willo Pequegnat, Carl Bell, 2011-10-22. Three decades into the HIV pandemic, the goals remain clear: reduce the number of infections, improve the health outcomes of those who are infected, and eliminate disparities in care. And one observation continues to gain credence: families are a powerful resource in preventing, adapting to, and coping with HIV. Recognizing their complex role as educators, mentors, and caregivers, *Family and HIV/AIDS* assembles a wealth of findings from successful prevention and intervention strategies and provides models for translating evidence into effective real-world practice. Chapters spotlight the differing roles of mothers and fathers in prevention efforts, clarify the need for family-community collaborations, and examine core issues of culture, ethnicity, gender, and diagnosis, e.g., minority families, adolescents with psychological disorders. Throughout, risk reduction and health promotion are shown as a viable public health strategy. A reference with considerable utility across the health, mental health, and related disciplines, *Family and HIV/AIDS* will be a go-to resource for practitioners working with families, researchers studying at-risk populations, administrators seeking to create new or evaluate existing prevention and care programs, and policymakers involved in funding such programs.

Each chapter focuses on a different aspect of measurement so that the handbook as a whole covers the full spectrum of core issues related to design, method, and analysis within measurement studies.
