Social Construction In Context

Richard Bailey

Social Construction In Context:

Social Construction in Context Kenneth J Gergen, 2001-04-03 This latest book by one of the world's leading protagonists in the field will be welcomed not just by psychologists but by students, academics and professionals interested in social constructionism across a wide range of subjects. *Social Construction in Context* explores the potentials of social constructionist theory when placed in diverse intellectual and practical contexts. It demonstrates the achievements of social constructionism and what it can now offer various fields of inquiry, both academic, professional and applied, given the proliferation of the theory across the social sciences and humanities. First order issues of concern within the academic world: objectivity, truth, power and ideology are now being augmented by widespread developments in practice, therapeutic, pedagogical, organizational and political. This book looks closely at these developments and examines both the positive potentials and limitations of social constructionist theory when applied to a variety of domains. It has been written in an accessible and scholarly manner, making it suitable for a wide ranging readership. *Social Construction* Kenneth J Gergen, Mary Gergen, 2003-04-03 This reader introduces a number of important viewpoints central to social constructionism and charts the development of social constructionist thought. **Handbook of Constructionist Research** James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences. But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance and the remarkable diversity within the field. This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research, how it is put into practice in multiple disciplines and where it may be headed in the future. The volume critically examines the analytic frameworks, strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism, making it an authoritative reference for anyone interested in conducting research in a constructionist vein. *Social Referencing and the Social Construction of Reality in Infancy* S. Feinman, 2013-06-29 Integrating the perspectives of a number of disciplines, this work examines social referencing in infants within the broader contexts of cognition, social relations and human society as a whole. *The Social Construction of Rationality* Onno Bouwmeester, 2017-03-16 There are many different forms of rationality. In current economic discourse the main focus is on instrumental rationality and optimizing, while organization scholars, behavioural economists and policy scientists focus more on bounded rationality and satisficing. The interplay with value rationality or expressive rationality is mainly discussed in philosophy and sociology but never in an empirical way. This book shows that not one but three different forms of rationality: subjective, social and instrumental, determine the final outcomes of strategic decisions executed by major organizations. Based on an argumentation analysis of six high profile public debates, this book adds nuance to the concept of bounded rationality. The chapters show how it is socially constructed and thus dependent on shared beliefs or knowledge, institutional context and personal interests. Three double case studies investigating the three rationalities

illustrate how decision makers and stakeholders discuss the appropriateness of these rationalities for making decisions in different practice contexts The first touches more on personal concerns like wearing a niqab or looking at obscene art exposed in a public environment the second investigates debates on improving the rights and position of specific minorities and the third is based on the agreement on instrumental reasons for two kinds of investments but the cost arguments are regarded less relevant when social norms or personal interests are violated The Social Construction of Rationality is for those who study political economy economic psychology and public policy as well as economic theory and philosophy **Social Construction and Social Work Practice** Stanley L. Witkin, 2011-11-22 Social construction addresses the cultural factors and social dynamics that give rise to and maintain values and beliefs Drawing on postmodern philosophies and critical social and literary theories social construction has become an important and influential framework for practice and research within social work and related fields Embracing inclusivity and multiplicity social construction provides a framework for knowledge and practice that is particularly congruent with social work values and aims In this accessible collection Stanley L Witkin showcases the innovative ways in which social construction may be understood and expressed in practice He calls on experienced practitioner scholars to share their personal accounts of interpreting and applying social constructionist ideas in different settings such as child welfare agencies schools and the courts and with diverse clientele such as resistant adolescents disadvantaged families indigenous populations teachers children in protective custody refugee youth and adult perpetrators of sexual crimes against children Eschewing the prescriptive stance of most theoretical frameworks social construction can seem challenging for students and practitioners This book responds with rich illustrative descriptions of how social constructionist thinking has inspired practice approaches illuminating the diversity and creative potential of practices that draw on social constructionist ideas Writing in a direct accessible style contributors translate complex concepts into the language of daily encounter and care and through a committed transnational focus they demonstrate the global reach and utility of their work Chapters are provocative and thoughtful reveal great suffering and courage share inspiring stories of strength and renewal and acknowledge the challenges of an approach that complicates evidence based evaluations and requirements *The Social Construction of Age* Patricia Andrew, 2012-01-11 This book explores the social construction of age in the context of EFL in Mexico It is the first book to address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it investigates how adults of different ages experience learning a new language and how they enact their age identities as language learners By approaching the topic from a social constructionist perspective and in light of recent work in sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender ethnicity and social class *The Social*

Construction of Landscapes in Games Dennis Edler, Olaf Kühne, Corinna Jenal, 2022-06-25 The book is dedicated to a compilation of diverse and creative landscapes which occur in games Being part of a game setting these landscapes trigger social construction processes in specific ways A selection of twenty four research articles addresses the social constructions of landscapes represented in analogue digital and hybrid game formats as well as their theoretical framing and future perspectives

Self-Construction in a Transcultural Context Yijia Zuo, 2022-07-16 This book explores the ways in which individuals construct and integrate self positions in a transcultural context by adopting a pluralist theoretical and methodological approach that includes both Western post modern viewpoints and ancient Chinese philosophical ideas The book starts with stories of two second generation Chinese young people and their mothers life experiences in the UK which can be seen as an epitome of individuals living in the modern and complex environment of the time Using social constructionist viewpoints it then analyzes the overt interaction between the individual and outside environment and interprets the recessive interaction such as the individual s psychological response to the outside environment which might be unknown to him or herself using the psychodynamic approach based on object relations theory and other psychoanalytic concepts such as defense mechanisms The book uses Confucian philosophy to show how Chinese people think about the relation between other people and themselves and also integrates different and even opposing theories and viewpoints from Taoist philosophy This creative book provides a theoretical and practical approach to explore the conception of self and the way in which individuals construct their self positions in a complex context Combining cutting edge Western psycho social viewpoints and ancient Chinese philosophy it appeals to readers interested in self psycho social approaches psychoanalytic viewpoints and Chinese philosophy

Pastoral Identity as Social Construction Samuel Park, 2017-09-15 How do chaplains and counselors form their identities as pastoral caregivers in challenging clinical contexts such as institutional interdisciplinary postmodern inter cultural and multi faith work environments This book is a product of the fifteen year long journey towards answering a well known but hardly answered question about pastoral identity Based on narratives of many pastoral practitioners who work in hospitals or counseling settings the author puzzles through ways for helping professionals to form their identities in bewildering work environments Previous studies on pastoral identity have focused on an individual interiority of pastoral practitioners and have emphasized mainly the caregivers perceptions and practices from a developmental and training perspective Grounded in an empirical study of active pastoral care providers this book presents pastoral identity as a relational and interactional property socially constructed among pastoral care partners culture and God Findings of the empirical study support contemporary theological and social psychological discourses identity is embedded in and embodied by relationships This book will guide you through confusions worries insights and woes you have experienced while helping others in order to envision yourself more clearly as a spiritually embodied and pastorally tending caregiver You will find yourself to be more who you are and engage more with others as they become who they are

This is likewise one of the factors by obtaining the soft documents of this **Social Construction In Context** by online. You might not require more mature to spend to go to the ebook instigation as capably as search for them.
