Stempsey, 2005-12-11 The germs of the ideas in this book became implanted in me during my experience as a resident in clinical pathology at Boston University Medical Center At the time I had inklings that the test results churned out by our laboratories were more than scientific facts As a philosophically unsophisticated young physician however I had no language or framework to analyze what I saw as a deep philosophical problem a problem largely unrecognized by most physicians The test results provided by our laboratories were accurate and of great practical importance for patient care However most of the physicians who relied on our test results to diagnose and treat their patients either did not have the time or interest to consider the philosophical issues inherent in diagnosis or like me had inadequate means to further analyze them It was more than ten years later that I began doctoral studies in philosophy and I was fortunate to find a faculty that was supportive of my efforts to address the problem This book began as my doctoral dissertation in the Department of Philosophy at Georgetown University I would like to acknowledge the assistance of my mentor Robert Veatch Ph D Our conversations during my Georgetown years led me in new and often fascinating directions I would also like to acknowledge the help of Kenneth Schaffner M D Ph D **Introduction to Epidemiology** Ray M. The Wages of Seeking Help Carol Bohmer, 2000-03-30 Because women are more likely to seek professional help and because they are more likely to be the victims of abuse by people in positions of power women who do seek professional assistance may end up being victims of sexual exploitation by the very people from whom they seek help Unlike other problems which primarily affect women such as rape and domestic violence this issue has received little public attention and has had little success in building a social movement to combat it Bohmer analyzes the social construction of this unique problem and the response it has received from individuals groups and various institutions such as the law and the regulatory process Bohmer explains why this problem has a different history from other problems facing primarily women and why it has not had much success in stirring social movement for addressing the problem Using other issues of feminist concern Bohmer connects the problem of professional sexual exploitation to issues of gender and power and shows the ways in which women seeking help are punished for doing so In addition the available self help groups and organizations are examined in light of their benefits and relative lack of success in combating the problem The legal and regulatory systems in place are also discussed in terms of the ways in which society responds to new social problems as they receive public attention
