Mergers, Markets and Public Policy Giuliano Mussati, 1995-09-30 GIULIANO MUSSATI Why do mergers occur which are their effects on social welfare and which is the best economic policy toward them These three questions have been puzzling industrial economists since the end of the last century when the first great merger wave has come about in the US They have returned at the centre of the stage of the theoretical and empirical economic research during the last decade when merger and acquisition activity became one of the most evident firms activities in all industrialised countries being fostered by some general and country specific facts These facts have been identified in the appearance of new financial instruments facilitating fund raising by firms in the benevolent behaviour of the authorities in charge of competition policy during the Reagan administration in the US while internal market completion has become a strong incentive for European firms to reach a true continental dimension in the UE through external growth However a robust and univocal answer to these questions has not yet been found in spite of its importance not only from the theoretical point of view but also from the normative one In fact the correct identification of firms motivations in pursuing merger and acquisition operations and of their consequences on social welfare would help the choice by administrative authorities of different possible options in competition and industrial policies

House. Committee on Ways and Means. Subcommittee on Trade,1977 Presidential Responsiveness and Public Policy-Making Jeffrey E. Cohen,2010-05-07 We expect a president to respond to public opinion as an elected official in a democracy Indeed the president needs public support to overcome opposition to his policies in Congress and the bureaucracy At the same time the president may want to pursue policies that do not have widespread support How does public opinion affect presidential policy making Jeffrey Cohen finds that presidents are responsive to the public in selecting issues to focus on If an issue has captured the interest of the people then the president will focus on that issue Cohen finds that having chosen to work on an issue presidents pay less attention to public opinion when making a policy The president will try to maintain control over the details of the policy so that the outcome fits his policy agenda Cohen examines the way presidents from Eisenhower through Clinton have dealt with public opinion in policy making He uses case studies of issues such as Clinton and gays in the military Bush and the extension of unemployment benefits and Kennedy and cutting the income tax to explore the relationship between presidents and public opinion In addition Cohen uses a quantitative analysis of State of the Union addresses and positions on roll call votes of presidents from Eisenhower through George Bush to test his theories This book should appeal to political scientists and historians interested in the presidency and in public opinion as well as general readers interested in the history of the American presidency Jeffrey Cohen is Professor of Political Science Fordham University
