The Cumulative Book Index, 1900 A world list of books in the English language      **Distorted Bodies and Suffering Souls.** Chantal Kwast-Greff, 2013 Chaos Pain Self mutilation Women starve themselves They burn or slash their own flesh or their babies throats and slam their newborns against walls Their bodies are the canvases on which the suffering of the soul carves itself with knife and razor In Australian fiction written by women between 1984 and 1994 female characters inscribe their inner chaos on their bodies to exert whatever power they have over themselves Their self inflicted pain is both reaction and language the bodily sign not only of their enfeeblement but also to a certain extent of their empowerment of themselves and their world The texts considered in this book chiefly by Margaret Coombs Kate Grenville Fiona Place Penelope Rowe Leone Sperling and Amy Witting function as both defiance and acceptance of prevailing discourses of femininity and patriarchy between submission and a possible future The narratives of anorexia bulimia fatness self mutilation incest and murder shock the reader into an understanding of deeper meanings of body and soul and prompt a tentative interpretation of fiction in relation to the world of real women and men in contemporary white Australia This is affective literature with the reader in voyeuristic complicity Holding up the mirror of fiction the women writers act perforce as a social lever their narratives as Bildungsromane But there is a risk that of reinforcing stereotypes and codes of conduct which supposedly long gone still represent women as victims Why are the female characters self destroyers and victims Why are they not heroes saviours or conquerors If women read about women themselves and feel pity for the Other they read about they will also feel pity for themselves there is little happiness in being a woman But infanticide and distorting the body are problem solving

behaviours In truth the bodies of the female characters bear the marks and scars of the history of their mothers and the history of their grandmothers indeed that of their own the history of survivors Catalog of Magic Marvin Kaye,1977

The Zen of Magic Squares, Circles, and Stars Clifford A. Pickover,2011-11-28 Humanity's love affair with mathematics and mysticism reached a critical juncture legend has it on the back of a turtle in ancient China As Clifford Pickover briefly recounts in this enthralling book the most comprehensive in decades on magic squares Emperor Yu was supposedly strolling along the Yellow River one day around 2200 B C when he spotted the creature its shell had a series of dots within squares To Yu's amazement each row of squares contained fifteen dots as did the columns and diagonals When he added any two cells opposite along a line through the center square like 2 and 8 he always arrived at 10 The turtle unwitting inspirer of the Yu square went on to a life of courtly comfort and fame Pickover explains why Chinese emperors Babylonian astrologer priests prehistoric cave people in France and ancient Mayans of the Yucatan were convinced that magic squares arrays filled with numbers or letters in certain arrangements held the secret of the universe Since the dawn of civilization he writes humans have invoked such patterns to ward off evil and bring good fortune Yet who would have guessed that in the twenty first century mathematicians would be studying magic squares so immense and in so many dimensions that the objects defy ordinary human contemplation and visualization Readers are treated to a colorful history of magic squares and similar structures their construction and classification along with a remarkable variety of newly discovered objects ranging from ornate inlaid magic cubes to hypercubes Illustrated examples occur throughout with some patterns from the author's own experiments The tesseracts circles spheres and stars that he presents perfectly convey the age old devotion of the math minded to this Zenlike quest Number lovers puzzle aficionados and math enthusiasts will treasure this rich and lively encyclopedia of one of the few areas of mathematics where the contributions of even nonspecialists count
