Schmadel,Gert Zech,2013-03-14 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since  
1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared  
under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly  
in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of  
astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of  
the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved  
by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the  
advantage of greater convenience for the user Volume 20 contains literature published in 1977 and received before February  
20 1978 some older literature which was received late and which is not recorded in earlier volumes is also included We  
acknowledge with thanks contributions to this volume by Dr J BouSka Prague who surveyed journals and publications in  
Czech and supplied us with abstracts in English and by Prof P Brosche Bonn who supplied us with literature concerning some  
border fields of astronomy      **Insect Clocks** D. S. Saunders,2014-05-19 Insect Clocks is mainly concerned with the  
phenomena in which environmental time has a practical implication for the life of insects for them to perform behavioral or  
physiological episodes at the right time and season This text first discusses the concept of rhythms and clocks along with the  
seasonal changes in the environment that affect a particular group of organisms This book then explains circadian rhythms of  
insects Photoperiodism and seasonal cycles of development photoperiodic response clock and counter and other types of  
insect clock are also tackled This text concludes by explaining the anatomical location of photoreceptors and clocks This  
publication will be invaluable to those interested in studying insects and their development affected by circles of influences
