schools that attribute their success to Ardith Davis Cole's Better Answers process. Since 2002, her book *Better Answers* has offered teachers and school districts a powerful alternative to test prep workbooks. It presents a dramatically different instructional model that helps students construct thoughtful test responses but it also prepares them for any task requiring thorough, cogent answers to questions and prompts both in and out of school. Now, with students tested more frequently than ever and with teachers increasingly concerned about incorporating substantive test-taking skills into children's learning, Ardith Cole responds with a new, updated and expanded edition of *Better Answers*. Informed by Ardith's ongoing work in classrooms where students struggle over constructed response tasks, the new edition makes the *Better Answers* sandwich even easier to implement. The book has also been significantly reorganized as well as expanded to include two new chapters: *Understanding the Prompt* and *What to do When*. Also included is a resource-packed CD-ROM that contains everything teachers need to support their lessons and is a great tool for staff development: lesson plans for text-based and self-based responses, power point slides, charts, and other visual supports; sets of sample texts with prompts; sample student responses; assessment forms; extensive bibliography of print and online resources. The *Better Answers* process is easy to grasp and uses a gradual release instructional process that begins with teacher modeling, invites increasing amounts of student participation, and eventually moves students into independent response writing. The book clearly explains each element of the process and provides helpful activities, authentic classroom vignettes, and tips on how to handle typical stumbling blocks along the way.

Drama-based foreign language learning Helga Tschurtschenthaler, 2013. What does another language do to the individual who learns and uses it? How is the individual's idea of self affected by the other language? This case study deals with these two overarching questions within the context of learning English as a foreign language through drama at a German upper secondary school in South Tyrol. It investigates how the students see themselves in their roles, how they perceive themselves as users of the foreign language, and how they experience themselves in role in another language. The results show how powerful drama-based activities can be and what educational impact they have. *Mastering Lua* Cybellium, 2023-09-26.
