through years of formal and informal study allowed him to craft a personal style difficult to categorize but unique and engaging By expanding our understanding and appreciation of Strong s artistic contributions this book offers a fitting tribute to one of America s finest landscape artists Bulletin ,1906 Statistics of Land-grant Colleges and Universities United States. Office of Education,1906 **An Introduction to Landscape** Peter J. Howard,2016-12-05 Inspiring deep emotion landscape carries many meanings This book follows the development of several threads of the concept of landscape as they have evolved across disciplines and across countries leading to the European Landscape Convention and the designation of cultural landscapes as World Heritage Sites The book introduces the key notions of landscape such as landscape as meaning as picture as scale as scenery and as place It also considers the various factors which influence the way in which landscape is perceived now and in the past with all of the senses Finally it looks of the various ways of protecting managing and enhancing the landscape taking into account a future of climate change Beautifully illustrated and including capsules in each section which provide fascinating insights into subjects from reading pictures to mapping and GIS through a discussion of the range of types of landscape to issues such as eco museums this book provides an excellent introductory overview for any students with an interest in the landscape around us **The International Studio** Charles Holme,Guy Eglinton,Peyton Boswell,William Bernard M'Cormick,Henry James Whigham,1911 Transmedial Landscapes and Modern Chinese Painting Juliane Noth,2023-11-20 Chinese ink painters of the Republican period 1911 1949 creatively engaged with a range of art forms in addition to ink such as oil painting drawing photography and woodblock prints They transformed their medium of choice in innovative ways reinterpreting both its history and its theoretical foundations Juliane Noth offers a new understanding of these compelling experiments in Chinese painting by studying them as transmedial practice at once shaped by and integral to the modern global art world Transmedial Landscapes and Modern Chinese Painting shines a spotlight on the mid 1930s a period of intense productivity in which Chinese artists created an enormous number of artworks and theoretical texts The book focuses on the works of three seminal artists Huang Binhong He Tianjian and Yu Jianhua facilitating fresh insights into this formative stage of their careers and into their collaborations in artworks and publications In a nuanced reading of paintings photographs and literary and theoretical texts Noth shows how artworks and discussions about the future of ink painting were intimately linked to the reshaping of the country through infrastructure development and tourism thus leading to the creation of a uniquely modern Chinese landscape imagery **"Landscape Imagery, Politics, and Identity in a Divided Germany, 1968-1989"** Catherine Wilkins,2017-07-05 Landscape Imagery Politics and Identity in a Divided Germany 1968 1989 explores the communicative relationship between German landscape painting and the viewing public that developed in the wake of the student revolutions of the late 1960s The book demonstrates that contrary to some historical thinking more similarities than differences characterized the sociopolitical concerns of East and West Germans during the late Cold War Era and that it was these shared issues that were reflected in the revival of the

Romantic painting genre Catherine Wilkins focuses on recovering the agency of the individual artist and in revising historiography with sensitivity to narration from below Interdisciplinary in nature art historians can benefit from the study s analysis of images and artists not widely known outside of Germany Additionally the consolidation of statistics and data regarding German postwar cultural policy are relevant for political and cultural historians The author contributes to the ongoing multidisciplinary debates regarding Histoire Crois in arguing that a clear dichotomy between East Germany and West Germany did not exist but rather that the residents of both nations shared a concern over some of the same issues of the period and memory studies by using images as primary historical sources able to be employed in the recovery of potentially subversive memory and identity Issues related to gender relations environmentalism and spiritual belief are addressed by Wilkins with appeal for scholars working with those particular themes Poststructuralist and literary theorists as well can find arguments supporting an alternative means of writing history through artworks and private memories

Philadelphia's Cultural Landscape Katharine Martinez,2000 In their day from 1830 to 1930 the Sartain family of Philadelphia were widely admired as printmakers painters art administrators and educators This collection of essays examines their achievements of three generations of Sartains from John to his granddaughter Harriet *Landscape in the Longue Durée* Christopher Tilley,2017-10-06 Pebbles are usually found only on the beach in the liminal space between land and sea But what happens when pebbles extend inland and create a ridge brushing against the sky *Landscape in the Longue Dur e* is a 4 000 year history of pebbles It is based on the results of a four year archaeological research project of the east Devon Pebblebed heathlands a fascinating and geologically unique landscape in the UK whose bedrock is composed entirely of water rounded pebbles Christopher Tilley uses this landscape to argue that pebbles are like no other kind of stone they occupy an especial place both in the prehistoric past and in our contemporary culture It is for this reason that we must re think continuity and change in a radically new way by considering embodied relations between people and things over the long term Dividing the book into two parts Tilley first explores the prehistoric landscape from the Mesolithic to the end of the Iron Age and follows with an analysis of the same landscape from the eighteenth into the twenty first century The major findings of the four year study are revealed through this chronological journey from archaeological discoveries such as the excavation of three early Bronze Age cairns to the documentation of all 829 surviving pebble structures and beyond to the impact of the landscape on local economies and its importance today as a military training camp The results of the study will inform many disciplines including archaeology cultural and art history anthropology conservation and landscape studies

United States the Works Progress Administration developed the Federal Writers Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little known authors many of whom would later become celebrated literary figures were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. Published in 1941, the WPA Guide to Michigan documents the rich history and economies of the Great Lake State. From the Upper Peninsula to the Lower and the Straits of Mackinac, between the guide features many photographs of the distinctive geography as well as essays about marine lore, architecture, and in the essay on Detroit, the nation's burgeoning auto industry.
