**A Saga of Evolution and Legends of Environmental Disasters in the History of Mankind** Dr. Nikhil Chandra Misra, 2021-04-07 We are an integrated part of cosmos The substance related to the astronomical concepts forms the subject matter of Astronomy It broadly studies universe solar system planets galaxies meteoroids asteroids and several other astronomical bodies often thought to be of the status of celestial origin Out of the occurrence of a fluke manifestation one after the other resulting in the creation of life species and humans In modern times Hubble Telescope revolutionised planetary studies and outlived its lifespan What likely edge will James Webb have over Hubble Space Telescope which immensely enriched the human knowledge on Cosmos for about three decades Acclaimed scientists have contributed towards evolving a convincing narrative Often indisputable pieces of evidence and sometimes some intelligent hypothesis support it A tiny dot became universe followed by the birth of the sun moon the earth other planets nebula galaxy and milky ways and living kingdom Life evolved flora and fauna developed Five catastrophic extinctions occurred eliminating several species This journey is laid on twelve hours on a clock In due course Homo sapiens developed who brought along intricacies like Environmental Degradation Global Warming and Climate Change What length of the queue will be created if we trace the lineage of our generation back to the first human that appeared to roam about on the earth Narrative wavers from line tracks the life and achievements of ancient civilisations which laid the foundation stone for human societies and got eliminated due to damage to the fine balance of environmental sustainability This book refers to the ones like Indus valley civilisation the master traders the Sumerians the pioneers in many fields the mysterious Maya and incredibly industrious Rapa Nui All got exterminated As scientists continue to turn up even more signs of collapsed civilisations they are finding plenty of evidence that climate shifts are to blame to a considerable extent Why and how The narrative attempts to answer The chronicle is before you which might engender a child like fascination as you delve deeper and farther in it **The Ultimate Collection on UFOs** compiled from Wikipedia entries and published by by Dr Googelberg, 2012-06-11 Lots of information on sightings and everything from a scientific angle about them Compiled from Wikipediapages and published by DrGoogelberg Jesus Loves You and Evolution Is True Jason Lief, 2019-05-07 Science is not a danger to the faith of Christian youth In fact Sara Sybesma Tolsma an award winning scientist and Jason Lief a leading practical theologian argue that youth ministry needs science to help young people explore their relationship to God and engage their world faithfully Jesus Loves You and Evolution Is True invites the church and its leaders to open their minds and hearts to what science can tell us about our human lives and our connections to and role in our natural world But it does not stop there evolutionary science is theological argues Lief and Tolsma and so it must have a central place in the day to day work of youth ministry If the church wants to help youth develop robust spiritual lives and prepare them for the challenges that life will bring them pastors faith leaders and youth workers must not only engage science but embrace its lessons for the life and practice of Christian faith

today [Scientists as Prophets](#) Lynda Walsh,2013-06-11 Why did an atheist like Carl Sagan talk so much about God Why does NASA climatologist James Hansen plead with us in his recent book not to waste Our Last Chance to Save Humanity Because science advisors are our new prophets Lynda Walsh argues in *Scientists as Prophets A Rhetorical Genealogy* She does not claim as some scholars have that these public scientists push scientism as a replacement for religion Rather she puts forth the provocative argument that prophetic ethos is a flexible type of charismatic authority whose function is to manufacture certainty Scientists aren't our only prophets Walsh contends but science advisors predictably perform prophetic ethos whenever they need to persuade their publics to take action or fund basic research Walsh first charts the genealogy of this hybrid scientific prophetic ethos back to its roots in ancient oracles before exploring its flourishing in 17th century Europe She then tracks its performances and mutations through several important late modern events in America Robert Oppenheimer's role in the opening of the atomic age Rachel Carson's interventions in pesticide use the mass media polemics of science popularizers such as Carl Sagan Stephen Hawking and Stephen Jay Gould and finally the UN's climate change panel and their role in Climategate Along the way Walsh highlights the special ethical and political defects embedded in the genealogy of the scientist prophet and she finishes by evaluating proposed remedies She concludes that without a radical shift in our style of deliberative policy making there is little chance of remedying the dysfunctions in our current science advising system A cogent rhetorical analysis of over 1 000 archival documents from 10 historic cases *Scientists as Prophets* engages scholars of scientific rhetoric history and literacy but is also accessible to readers interested in the roots of current political debates about the environment nuclear energy and science education

**God: the Evidence** Ronald W. Larsen PhD,2022-09-19 The holy grail of physics is quantum gravity often called the theory of everything But any scientific theory will be incomplete without the God of the Bible Physicists claim the cosmos began with a big bang created from nothing But the word nothing is meaningless in physics Furthermore the big bang is an impenetrable barrier to whatever preceded it In addition a finite cosmos cannot contain within itself an explanation for its own existence To claim we are here by accident explains nothing and leads to a logical dead end The cause of the universe is information in the form of mathematical laws left behind for science to discover The fundamental properties of these laws have the same attributes as the Supreme Lawgiver of Genesis An intelligible cosmos is unmistakable evidence the Creator is an Intelligent Mind The Creator s Voice is a valid scientific theory confirming the truth of Genesis God spoke the laws creating the universe out of nothing creatio ex nihilo The foundation of the universe is ethereal cosmic waves which interact according to the laws to create and sustain the illusion of reality we experience Space time energy and matter are made from quantum information nothing else is needed By a process of elimination God is the only possible explanation for everything we know The human mind is evidence consciousness is endemic to the cosmos Cosmic waves interact with the human mind in mysterious ways The cosmos relates to humans more like a great Mind than a mindless machine The god like nature of the human mind is evidence we are made imago Dei Even if God is included in a scientific theory it means little unless it can be shown God is a real Being alive present in the world and relevant to our lives *Prime Elements of Ordinary Matter, Dark Matter & Dark Energy* Vladimir B. Ginzburg,2007 The book describes a history of the vortex theory Introduced at the dawn of science almost 2600 years ago it had passed through five phases of accumulation of its strength by absorbing the discoveries made during the Greek civilization the Copernicus Revolution the age of electromagnetism the atomic age and the information age During the first four phases see Chapters 1 through 12 of this book the development of the vortex theory followed the same unfortunate pattern Each time this theory managed to bring attention of a new generation of brilliant scientists who were enchanted by a deep physical meaning of its basic concept But although they employed the latest advances in science none of them was able to produce a mathematical tool making the vortex theory practically usable The fifth phase began in 1993 with the discovery of a unique spacetime spiral element called the toryx The toryx is a particular case of a multiple level dynamic spiral with a poetic name helicoid that describes the paths of all moving celestial bodies in our universe The ability of the toryx to be turned inside out made it perfect for modeling the polarized prime elements of matter A close offspring of the toryx called the helix turned out to be ideal for modeling the polarized prime elements of the radiation particles This discovery led to the development of a new version of the vortex theory called Three Dimensional Spiral String Theory 3D SST outlined in Chapters 13 through 16 **Creation Stories in Dialogue: The Bible, Science, and Folk Traditions** Jan G. van der Watt,R. Alan Culpepper,2015-11-02 This book is about creation stories in dialogue not only between different religious views but also between current day scientific perspectives International specialists like Alan

Culpepper David Christian John Haught Randall Zachman Ellen van Wolde from various disciplines are reflecting on the interface between science and religion relating questions of creation and origin This multi disciplinary discussion by some of the leading exponents in this field makes the book unique not only in its depth of discussion but also in its wide ranging interdisciplinary discussion The point of departure of all the contributions is the prestige lecture by Alan Culpepper where he argues for bringing Biblical material into discussion with modern scientific insights relating to creation and origin

Ferocious Minds Damien Broderick, 2005-01-01 Two centuries ago the first Enlightenment failed when its dream of reason smashed into the passions and fury of stubborn humans Without a deep broad understanding of the world the emerging Enlightenment was left floundering its best impulses perverted into the bloody excess of the French Revolution Arguably its idealism and noble goals led directly and shockingly to the 20th century's totalitarian nightmares Now the 21st century is learning anew the Faustian hunger to know everything that can be known But Enlightenment values of reason and tolerance enriched by new knowledge face a complex world no less eager to embrace medieval terrorism and ancient superstitions a world bizarrely denying itself many of the fresh opportunities and insights available by science Can we find cures for poverty unhappiness ignorance the ruination of the planet aging and perhaps for death itself If so should we Damien Broderick's own ferocious mind invites you to explore today's unexpected treasure house of understanding and provides enticing glimpses of tomorrow's

*Meteoric Life of a Mathematician* Sunil N. Shabde, 2012-10-16 In British India during the 1920s a brilliant student jumped from graduation directly into research in the subject of his passion mathematics rejecting lucrative career options In the next 20 years with whirlwind speed he made exceptional achievements with his voluminous work in Legendre polynomials and his original work in Albert Einstein's Unified Field Theory at the Edinburgh University using a futuristic approach of fifth dimension His research was characterized not only by its originality and speed but by the fact that it was done almost single handedly without the luxury of working in a top tier university such as Harvard or Berkeley His publications including a book on Unified Field Theory received highly favorable reviews from renowned mathematicians such as Bateman Erdős and McC of Caltech Pasadena and Rainich of the University of Michigan In 1947 at the age of 40 he became one of the top few mathematicians in India and he was in a position to reach greater heights by moving to a better known research institution in India or in the United States Instead he followed his second passion education With a desire to give back to India he chose to contribute to higher education which the newly independent India desperately needed if she was to make rapid progress in science and technology Innocently unaware of hurdles he would face from the government he struggled through With sheer drive and creativity he made phenomenal contributions to the colleges of his state However being a man of research he was working against his instincts in a politically driven system Without recognition he fought for his dreams causing an unseen impact on his health This brilliant mathematician and devoted educator passed away at an early age of 54 before he was able to reach his goals as if somebody took away Van Gogh's

paintbrush     The Fire in the Equations Kitty Ferguson, 2004-06-08 Heralded for its readability and scholarship The Fire in the Equations offers a fascinating discussion of scientific discoveries and their impact on our beliefs The book s title is derived from Dr Stephen Hawking s pondering What is it that breathes fire into the equations and makes a universe for them to describe     The Declaration of Independence, God, and Evolution Simon D. Perry, 2016-06-27 In this book Simon Perry has brought together a discussion of politics philosophy religion and science by using the Declaration of Independence as a backdrop He questions whether Jefferson was motivated by God Is there a role for religion in our government Is God real or a fantasy Is the Good Book really good Why has man turned to God to achieve eternal life Does the mythicism of creation prevail over evolution Is man indoctrinated at an early age to accept God unconditionally These are but a few of the questions that he deals with As you read you will discover others He spent five years researching this book and it relies heavily on the great scholars of religion science and politics This book lays bare our cognitive distortions of who we are and where we came from     **Oracles of Science** Karl Giberson, Mariano Artigas, 2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic     **Cosmology Without God?** David Alcalde, 2019-06-26 Is God a superfluous hypothesis for modern cosmology According to the normal understanding of modern science the answer should be affirmative because modern science is supposed to be free of metaphysical and theological presuppositions However despite its self proclaimed neutrality regarding metaphysics and theology modern science is full of metaphysical and theological presuppositions These can be summarized as a mechanistic understanding of nature a reduction of God to an external agent in competition with natural processes and creation to a worldly mechanism These presuppositions are deficient and untenable and they remain unconscious for the most part in the dialogue between science and theology making it intellectually impossible because of the reduced notions of God nature and creation assumed Using

the coherent and unreduced image of God and nature provided by the Christian doctrine of creation ex nihilo Fr David Alcalde intends to uncover and criticize the incoherent theological assumptions inherent in a concrete branch of modern science which is modern cosmology The author points out the presence of these inadequate theological presuppositions in both the theologians who use modern cosmology to offer scientific proof for the existence of God and the atheistic cosmologists who use their science to reject the idea of God

**PHYSICS AND SUFI COSMOLOGY** Sardar Irshad Shaheen,2023-11-27 The perennial enigma the human mind has been encountering is the meaning of life and its place in the universe On this subject science and spirituality remained in discord with each other particularly for the last couple of centuries The Theory of Relativity followed by quantum mechanics changed the worldview of traditional mindset altogether The postulates of quantum physics paved the way for growing interest in philosophical spirituality Theoretical physicist Fritjof Capra s book *The Tao of Physics* explored parallels between Eastern mysticism and modern science Toshihiko Izutsu in his book *Sufism and Taoism* found similarities between Taoism and Muslim mysticism or Sufism The book under review attempts to discover compatibility between Sufism and modern cosmology It is basically a research book with more than seven hundred 700 citations of authorities of various disciplines drawing from a vast array of diverse fields such as physics philosophy biology psychology and spirituality The book probes into the nature and value of existence which ultimately leads to the direction of interconnection of the universe and human psyche unity and integration of all things and ultimately the unity of the whole universe and the whole person These views are not placed on the shaky foundations of faith but they are based on philosophical logic and scientific facts regarding importance of man as an observer in the universe despite appearing insignificant on a point like planet in the stunning vastness of empty space and magnificent integration and harmony of the human psyche with the cosmos These aspects of the book are unique in the sense that they amazingly reveal commonalities between physical and spiritual concepts and explain the phenomenon of existence as a compact whole in a coherent and logical sequence with a glimpse of futuristic existence This book may be of particular interest to the academia research scholars and students who may find the contents of the book unique and even startling The author of the book is a research scholar from Pakistan who has been dedicated to exploring the reality of the physical world and human life He has accentuated quite subtle and intricate issues in his book His contribution to the relevant subject appears to have originality and at times remarkable distinction The author believes that the contents of this book may not be found in any other single book published so far

*The Spacetime Origin of the Universe* Vladimir Ginzburg,2013-08-19 This book describes the basic concept of the Universal Spacetime Theory UST During its development I was stimulated by many scientific ideas proposed since the dawn of science that I described briefly in Chapter 1 In the UST these ideas took on a completely new form thanks to my discovery of a spiral string entity that I named the toryx The toryx turned out to be a perfect candidate for a prime element of nature This however was only the tip of the iceberg Besides yielding the unified laws applicable to both micro and

macro worlds the toryx helped me to find the answer to the most puzzling question of science      **Render Unto Darwin**

James H. Fetzer, 2013-12-05 With exceptionally clear analysis James Fetzer dissects the philosophical issues underlying today's most contentious moral debates He examines unflinchingly the controversies where science religion and politics meet intelligent design creationism evolution abortion stem cell research and human cloning and offers a concept of morality based on respect of individual rights not religion      Knowledge and Knowledge Systems: Learning from the Wonders of the Mind Geisler, Eliezer, 2007-09-30 Previous research in the knowledge management and information systems fields simply define knowledge by a few categories and then describe knowledge systems and their usage and the difficulties with them Knowledge and Knowledge Systems Learning from the Wonders of the Mind starts from the beginning where and how knowledge is formed and how it can be measured describing humans and their knowledge path from conception and birth to maturity
