The Physical Geography of Northern Eurasia Maria Shahgedanova, 2003 This is the third volume in The Oxford Regional Environments series The series volumes are devoted to major regions of the world each presenting a detailed and up to date body of scientific knowledge concerning a particular region For most topics on the physical geography of Northern Eurasia abundant literature now exists Most of it however is in Russian and other East European languages and this has significantly limited the number of potential readers This volume seeks to familiarize at an international level those with an interest in this area with the most significant achievements in classical and current geographical research The Physical Geography of Northern Eurasia covers most of the territory of the former USSR The first section discusses the individual components of the physical environment These chapters cut across regional boundaries and

treat the area discussed as a whole. A regional analysis follows mainly in the context of geographical zonation though a number of specific regions are given individual treatment. The concluding chapters discuss the effects of anthropogenic activities on the physical environment. The approach is an integrative one tying together various aspects of the physical environments with the environmental implications of human activities. Every component of the environment is treated as a step in the development of the multi-faceted landscapes which in turn provide possibilities and limitations for cultural and economic usage.

Psalm 91 and Demonic Menace Gerrit C. Vreugdenhil, 2020-07-13. In *Psalm 91 and Demonic Menace* Gerrit Vreugdenhil offers a thorough analysis of the text structure and genre of Psalm 91. Already in its earliest interpretations Psalm 91 has been associated with the demonic realm. The use of this psalm on ancient amulets and in magic texts calls for an explanation. Examining the psalm's images of threat from a cognitive science perspective Vreugdenhil shows that many of these terms carry associations with sorcery and magic incantations and curses, diseases and demonic threat. The psalm takes demonic threat seriously but also draws attention to the protection offered by JHWH. Finally the author proposes an outline of the situational context in which Psalm 91 might have functioned.

Drones, Tones, and Timbres Carole Pegg, 2024-01-09. An indispensable study of the music of Altai Sayan peoples. Based on more than twenty years of collaborative research Carole Pegg's long-awaited participatory ethnography explores how Indigenous nomadic peoples of Russia's southern Siberian republics Altai Khakassia Tyva sound multiphonies of place in a post-Soviet global world. Inspired by the mountain steppe ecology and pathways of nomadism soundscapes created in performative ritual events cross political and multiple world boundaries in a shamanic animist universe enabling human and spirit actor interactions in a series of sensuous worlds. As with the throat singing for which Indigenous Altai Sayan peoples are famous senses of place involve sonic relations rootedness movement and plurality. Pegg echoes their drone partials musical and ontological models in an innovative theoretical entwinement. Three strands form the book's multivocal drone the partials of which sound in each chapter: ontological sonicality and musicality that enables emplacement and movement; the importance of shamanism animism at the core of Indigenous spiritual practices for personhood and community and the agency of sonic performances. Sounding place Pegg demonstrates is essential to the identities ways of life and very senses of being of Indigenous Altai Sayan peoples.

Hidden Paradigms Brenda E.F. Beck, 2023-03-30. Understanding an epic story's key belief patterns can reveal community level values the nature of familial bonds and how divine and human concerns jockey for power and influence. These foundational motifs remain understudied as they relate to South Asian folk legends but are nonetheless crucial in shaping the values exemplified by such stories' central heroes and heroines. In *Hidden Paradigms* anthropologist Brenda E.F. Beck describes *The Legend of Ponnivala* an oral epic from rural South India. Recorded in 1965 this story was sung to a group of village enthusiasts by a respected pair of local bards. This grand legend took more than thirty-eight hours to complete over eighteen nights. Bringing this unique example of Tamil culture to the attention of an international audience.

Beck compares this virtually unknown South Indian epic to five other culturally significant works the Ojibwa Nanabush cycle the Mahabharata an Icelandic Saga the Bible and the Epic of Gilgamesh establishing this foundational Tamil story as one that engages with the same universal human struggles and themes present throughout the world Copiously illustrated Hidden Paradigms provides a fresh example of the power of comparative thinking offering a humanistic complement to scientific reasoning

Neanderthals to the Samburu: Structure and Agency in Webs of Violence William P. Kiblinger, 2020-10-20. This book examines human conflict throughout history, the reasons behind the struggles, and why it persists. The volume delves into the causes of human conflict and what can be done about them. Based on detailed descriptions that support insightful interpretations, the book explores significant historical events in the course of human history. By pursuing a web of violence approach, it raises and answers questions about the sources of conflict and how it may or may not be resolved through investigations into human agency and practice. It evaluates lessons learned concerning human conflict, violence, and warfare. To illustrate these lessons, the book presents a broad geographical and temporal set of data, including research on the time of Neanderthals in Europe 20-30 thousand years ago, the Late Neolithic civilization on the Mediterranean 6-8 thousand years ago, medieval Ireland, contemporary history of the Western Dani peoples of West Papua, and finally recent issues in Brazil, Congo, and Kenya. **Life Strategies, Human Evolution, Environmental Design** V. Geist, 2013-11-11. Consider that you

were asked how to ensure human survival. Where would you begin? Conservation of resources jumps to mind. We need to conserve resources in order that economic activities may continue. Alas, this is a false start. Resources are always defined by a given economic system, and only it determines what is and what is not a resource. Therefore, conserving resources implies only the perpetuation of the appropriate economic system. Conservation of resources, as we know them, has nothing to do with the survival of mankind, but it has very much to do with the survival of the industrial system and society we live in today. We have to start, therefore, at a more basic level. This level, some may argue, is addressed by ensuring for human beings clean genes. Again, this is a mistaken beginning. It is thoroughly mistaken for reasons of science. It is a false start because malfunctioning organs and morphological structures are not only due to deleterious hereditary factors but particularly due to unfavorable environments during early growth and development. Moreover, eugenics is not acceptable to any but a small fraction of society. Eugenics may not be irrelevant to our future, but it is premature and should be of little concern until we understand how human genes and environment interact. **Unesco Sources**, 1990.
