Steroids Game:

Drug Games Thomas M. Hunt, 2011-01-15 On August 26 1960 twenty three year old Danish cyclist Knud Jensen competing in that year's Rome Olympic Games suddenly fell from his bike and fractured his skull His death hours later led to rumors that performance enhancing drugs were in his system Though certainly not the first instance of doping in the Olympic Games Jensen's death serves as the starting point for Thomas M Hunt's thoroughly researched chronological history of the modern relationship of doping to the Olympics Utilizing concepts derived from international relations theory diplomatic history and administrative law this work connects the issue to global political relations During the Cold War national governments had little reason to support effective anti doping controls in the Olympics Both the United States and the Soviet Union conceptualized power in sport as a means of impressing both friends and rivals abroad The resulting medals race motivated nations on both sides of the Iron Curtain to allow drug regulatory powers to remain with private sport authorities Given the costs involved in testing and the repercussions of drug scandals these authorities tried to avoid the issue whenever possible But toward the end of the Cold War governments became more involved in the issue of testing Having historically been a combined scientific ethical and political dilemma obstacles to the elimination of doping in the Olympics are becoming less restrained by political inertia

affront to the athletes who don't take shortcuts But this tidy view swindles sports fans While we may want the world sorted into villains and victims putting the blame on athletes alone ignores decades of history in which teams coaches governments the media scientists sponsors sports federations and even spectators have played a role The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup that is to tell the truth about the spectacle we crave In *Spitting in the Soup* sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports Johnson unwinds the doping culture from the early days when pills meant progress and uncovers the complex relationships that underlie elite sports culture the essence of which is not to play fair but to push the boundaries of human performance It's easy to assume that drugs in sports have always been frowned upon but that's not true Drugs in sports are old It's banning drugs in sports that is new *Spitting in the Soup* offers a bitingly honest clear-eyed look at why that's so and what it will take to kick pills out of the locker room once and for all **The Steroids Game** Charles E.
