The Long Telegram 2.0 Peter Eltsov, 2019-11-19 The Long Telegram 2.0 A Neo Kennanite Approach to Russia lays out an original argument for understanding Russia that goes deep into its history starting with the tri partite dictum orthodoxy autocracy nationality formulated in 1833 by count Sergey Uvarov The author explores Uvarov s triad in the context of modern Russia adding five more traits exceptionalism expansionism historical primordialism worship of the military and glorification of suffering The author argues that as presently constituted Russia cannot become a democracy and sooner than later it will disintegrate replicating the fate of the Soviet Union The key reasons for these according to the author are weak mechanisms for the transition of power poorly developed institutions of the state feeble economy and education frail ideology and most importantly the lack of a unified national identity Following this assessment the author defines a strategy for dealing with Russia based on a combination of offensive realism and realpolitik recommending that the West copes with Russia in a more pragmatic manner The book includes the author s translation of a unique historical document from the 1860s a pamphlet calling for the independence of Siberia on the example of the American revolution Complete Poetry of
