Still The Wild River Runs:

Still the Wild River Runs Byron E. Pearson, 2002 Between 1963 and 1968 environmentalists were outraged when western water interests sought to construct two dams in Grand Canyon as part of the Central Arizona Project The Sierra Club led a national campaign opposed to the project which most environmental historians credit with defeating the dams In the wake of its victory the Sierra Club has been lauded as the savior of Grand Canyon Byron Pearson now takes a closer look at history to show that the Sierra Club's ability to mobilize public opinion did not appreciably influence Congress where the issue was actually decided When Arizona congressman Stewart Udall became Interior Secretary in 1960 he promoted a plan to import water from the Pacific Northwest to California in order to placate that state's opposition to the CAP with its proposed dams When this support dissolved in the face of resistance from Washington senator Henry Jackson who chaired the Senate Interior Committee the pragmatic Udall sought passage of a bare bones CAP bill without the dams before he and Arizona senator Carl Hayden retired Despite this congressional deal making the Sierra Club received credit for blocking the dams and was propelled to the undisputed leadership of the environmental movement Using the myth that it had saved the Canyon the club transformed its image of power into real political influence after Congress passed the National Environmental Policy Act in 1970 giving environmental advocates access to the policy making process for the first time In revealing how the Sierra Club played a much lesser role in blocking the dams than they would have had the public believe Pearson contrasts the ways in which the controversy unfolded in the court of public opinion versus the actual political process He takes readers into congressional chambers and conference rooms reconstructing the legislative process to convey the full flavor of this political give and take Based on research in archives from all over the country *Still the Wild River Runs* will itself be a subject of controversy as it challenges long standing notions about the power of environmental lobbies By putting this chain of historical events in clearer perspective it can give citizens concerned with future causes a better understanding of the political process and what really moves it

Wild River Runs Ava Thompson, AI, 2025-01-12 *Wild River Runs* offers a comprehensive exploration of white water rafting that bridges the gap between scientific understanding and practical application The book masterfully weaves together the complex interactions between mountain river systems and the thrilling sport of rafting examining everything from basic river classifications to advanced team dynamics in challenging water conditions Through a careful balance of technical knowledge and hands on guidance it reveals how geological formations and water patterns create the various rapid classifications that rafters must navigate The book stands out for its thorough approach to safety and environmental awareness presenting the international river classification system Class I through VI alongside detailed analyses of safety equipment and protocols Drawing from extensive hydrology research and documented rafting experiences worldwide it offers readers unique insights into how factors like water volume gradient and obstacle placement determine river difficulty Particularly valuable is its examination of team dynamics in high stress environments

supported by real world case studies from renowned rafting destinations including the Colorado River and Norway's mountain rivers. Progressing from fundamental concepts to advanced applications, the text covers essential topics such as river reading techniques, weather pattern influences, and emergency protocols. What makes this guide especially valuable is its interdisciplinary approach, combining elements of geology, meteorology, and group psychology to create a comprehensive understanding of safe rafting practices. The book maintains its relevance for both novice rafters and experienced professionals by addressing current issues in river conservation while providing practical guidance for trip planning and risk assessment.

The Man Who Built the Sierra Club Robert Wyss, 2016-06-07 David Brower 1912-2000 was a central figure in the modern environmental movement. His leadership vision and elegant conception of the wilderness forever changed how we approach nature. In many ways, he was a twentieth-century Thoreau. Brower transformed the Sierra Club into a national force that challenged and stopped federally sponsored projects that would have dammed the Grand Canyon and destroyed hundreds of millions of acres of our nation's wilderness. To admirers, he was tireless, passionate, visionary, and unyielding. To opponents and even some supporters, he was contentious and polarizing. As a young man growing up in Berkeley, California, Brower proved himself a fearless climber of the Sierra Nevada's dangerous peaks. After serving in the Tenth Mountain Division during World War II, he became executive director of the Sierra Club. This uncompromising biography explores Brower's role as steward of the modern environmental movement. His passionate advocacy destroyed lifelong friendships and at times threatened his goals. Yet his achievements remain some of the most important triumphs of the conservation movement. What emerges from this unique portrait is a rich and robust profile of a leader who took up the work of John Muir and, along with Rachel Carson, made environmentalism the cause of our time.

Canoeing Wild Rivers Cliff Jacobson, 2015-03-01 The 30th Anniversary Edition of the classic *Expedition Canoeing* has long been considered the premier guide to canoeing and exploring North America's waterways. This thirtieth anniversary edition expertly details everything you need to know about paddling the continent's wild rivers. Outdoors writer and wilderness canoe guide Cliff Jacobson draws on his thirty-plus years of river running to give you sound advice, fresh new ideas, and advanced techniques for canoeing in the wilderness. Completely updated and revised, inside you'll find dozens of full-color photos, how-to illustrations, source charts, canoeing and camping tricks, a chapter full of hard-won advice from more than twenty-five of Jacobson's fellow canoeing experts, and a brand-new chapter devoted to paddling desert and swamp rivers. Look inside to find:

- How to pick a crew
- Route and trip planning
- Canoeing and camping gear
- Navigating by map, compass, and GPS
- How to deal with dangerous bears
- Canoe hazards and rescue
- Barren land travel
- Preparation and skills are everything when canoeing wild rivers

Take along this guide on all of your canoeing adventures.
