Versification

Frog, Satu Grünthal, Kati Kallio, Jarkko Niemi, 2021-12-24 Versification describes the marriage of language and poetic form through which poetry is produced Formal principles such as metre alliteration rhyme or parallelism take precedence over syntax and prosody resulting in expressions becoming organised as verse rather than prose The aesthetic appeal of poetry is often linked to the potential for this process to seem mysterious or almost magical not to mention the interplay of particular expressions with forms and expectations The dynamics of versification thus draw a general interest for everyone from enthusiasts of poetry or forms of verbal art to researchers of folklore ethnomusicology linguistics literature philology and more The authors of the works in the present volume explore versification from a variety of angles and in diverse cultural milieus The focus is on metrics in practice meaning that the authors concentrate not so much on the analysis of the metrical systems per se as on the ways that metres are used and varied in performance by individual poets and in relationship to language

Saami Linguistics Ida Toivonen, Diane Carlita Nelson, 2007 The papers in this volume describe and analyze an array of intriguing linguistic phenomena as they occur in the Saami languages ranging from etymological nativization of loanwords to the formation of deadjectival and denominal verbs Saami displays a number of characteristics that are unusual from a cross

Joseph, 2003 *The Oxford Guide to the Uralic Languages* Marianne Bakró-Nagy, Johanna Laakso, Elena Skribnik, 2022-03-24 This volume offers the most comprehensive and wide ranging treatment available today of the Uralic language family a group of languages spoken in northern Eurasia While there is a long history of research into these languages much of it has been conducted within several disparate national traditions studies of certain languages and topics are somewhat limited and in many cases outdated The *Oxford Guide to the Uralic Languages* brings together leading scholars and junior researchers to offer a comprehensive and up to date account of the internal relations and diversity of the Uralic language family including the outlines of its historical development and the contacts between Uralic and other languages of Eurasia The book is divided into three parts Part I presents the origins and development of the Uralic languages the initial chapters examine reconstructed Proto Uralic and its divergence while later chapters provide surveys of the history and codification of the three Uralic nation state languages Hungarian Finnish and Estonian and the Uralic minority languages from Baltic Europe to Siberia This part also explores questions of endangerment revitalization and language policy The chapters in Part II offer individual structural overviews of the Uralic languages including a number of understudied minority languages for which no detailed description in English has previously been available The final part of the book provides cross Uralic comparative and typological case studies of a range of issues in phonology morphology syntax and the lexicon The chapters explore a number of topics such as information

structure and clause combining that have traditionally received very little attention in Uralic studies The volume will be an essential reference for students and researchers specializing in the Uralic languages and for typologists and comparative linguists more broadly **Linguistica Uralica** ,2005 **CIM04, Conference on Interdisciplinary Musicology** ,2003
