*Hearings, Reports, Public Laws* United States. Congress. House. Committee on Education and Labor,1967      Federal Register ,1995      The Political Economy of Work in the 21st Century Martin Sicker,2002-03-30 When Congress enacted Social Security in 1935 with the age of retirement set at age 65 average life expectancy was 62 years By the time Medicare was enacted 30 years later life expectancy had risen to age 70 Since the enactment of Medicare life expectancy has risen to age 76 today and may be expected to increase further in the decades to come Clearly the increase in post retirement life expectancy has significant implications for the level of national expenditures attributable to an aging population One of the approaches suggested as a solution to the so called income transfer problem is to redefine old age that is to push retirement and its associated benefits off to a later age This would effectively increase the size of the workforce with older workers continuing to contribute their payroll taxes for an extended period of time The critical question Sicker poses is will there be enough appropriate employment opportunities for a growing number of older workers in the workforce of the future The evidence for a positive response is far from clear or compelling Sicker examines the prospective place of the aging worker in the employment environment of the 21st century in light of the restructuring of American business and the world of work in the final decades of the last century In doing so he raises serious concerns about the validity and utility of some of the neoclassical economic ideas and assumptions that have become part of the conventional wisdom of our time Sicker contends that these dubious propositions have unwittingly contributed significantly to the problem through their manifestation in public policy However the principal focus of his analysis is not on economic theory as such but on the realities and uncertainties that an aging American workforce will face in the decades to come This book is significant reading for scholars researchers and the general public interested in labor force and aging policy issues      **Non-Standard Employment and Quality of Work** Tindara Addabbo,Giovanni Solinas,2011-10-12 The international literature on non standard employment

has mostly focussed on its impact on employment and more recently on working and living conditions This volume explores these issues with special reference to Italy Italy is characterized by very low participation rates particularly women s a high degree of fragmentation of labour contracts and a very intense non standard work diffusion that make this context a particularly interesting case for analysis New elements of discussion are provided with reference to the interaction of non standard work employment probability and living conditions Interesting insights on the impact of non standard work on the transition to stable employment and workers careers emerge suggesting a possible failure of companies internal systems of work evaluation The effects on labour productivity and on companies performance are analysed Within this framework a new perspective on quality of work is suggested      Occupational Outlook Quarterly ,1999      **Congressional Record** United States.
