**Society, Landscape and Environment in Upland Britain** Ian D. Whyte, Angus J. L. Winchester, 2004 The landscapes of upland Britain have been the focus for a range of debates in recent years over issues such as access afforestation farming and planning However these landscapes have been neglected and misunderstood by contemporaries in the past and by modern historians There has been a lack of research into the societies and economies of these areas and the landscapes they created This volume of specially commissioned studies helps to redress this balance by examining a range of themes relating to the historic landscapes of areas from Cornwall to the Scottish Highlands They focus on the roles of continuity and change in shaping the landscapes that are so cherished today as National Parks and Areas of Outstanding Natural Beauty In the process the authors show how even modest gains in altitude can dramatically improve the survival in the landscape of many kinds of site demonstrating how

rich complex and multi layered our upland landscapes really are      *The Historian* ,2001      **The British National**
